Week 8 | Unit: Web Design Fundamentals | Grade: 9

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Differentiation	Resources and links for Parents
Lesson 14 Hyperlinks and Navigation	I can create working internal and external links and apply them to my website.	Skills development: MYP Criterion C.ii practice. Students create and test links within their website and to external sites. Support: model code and a link checklist. Challenge: refine navigation and explain design choices.	Ask your child to show an internal link and an external link. Can they explain where each link takes the visitor?
Lesson 15 Navigation Mini-Challenge and Peer Check	I can apply links to a small multi-page navigation challenge and use the skill in my website.	Formative: Hyperlinks, Images and Tables Activities. Peer checking tests navigation; feedback is recorded for refinement. Students identify and fix broken links.	Ask your child to demonstrate moving between pages. What feedback did they receive, and what did they improve?
Lesson 16 Images and Alternative Text	I can add and size images with meaningful alternative text and apply the skill to my website.	Skills development: MYP Criterion C.ii practice. Students add appropriately sized images and meaningful alt text. Support: model image code and description prompts. Challenge: refine image choice, sizing and accessibility.	Ask your child why they chose an image and how its alt text describes the information it conveys. Discuss how this helps visitors who cannot see the image.
Teacher notes and reminders	Please refer to toddle for task instructions and confirmed deadlines.		

Week 8 Learning Overview

Technology Integration	HTML hyperlinks, multi-page navigation, images and alternative text. Students test their website and refine it using feedback.
Cross-curricular links	English, Design, Business and Media Studies.
External Assessment Integration	Not specified for these lessons.
Wellbeing/ ATL Skills	Problem solving, communication, collaboration and reflection. Students give constructive feedback and consider accessibility for different visitors.
Standards	MYP Design Criterion C.ii practice. Lessons 14–15: PG 4, Computing Systems and Networks, CS.HS.2.1 — computer communication uses hardware and software components and can be configured in different ways. Lesson 16: PG 7, Computer Programming, CS.HS.3.2 — programming involves solving computational problems.
Inquiry/ TOK Question	How can I design and develop a personal multi-page website that uses structure and design principles to communicate information effectively to a specified audience?
Success Criteria (Measurable)	MUST: Complete each technical task successfully: create working links, connect pages and add sized images with meaningful alt text. SHOULD: Explain how each skill supports the final website and its intended audience. COULD: Refine work using feedback and add further detail, justification or technical quality.
National Identity Domain	Technology, innovation, entrepreneurship, AI and digital transformation support the UAE vision for a knowledge-based economy. Students develop responsible digital citizenship, sustainability awareness and future-ready skills.
