Week 8: 19th – 23rd October 2026

Subject: Integrated Math I **Unit Title: Unit 1: Foundations of algebraic relationships** **Grade: 9**

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1 and 2: System of equations	I can solve systems of equations by eliminating a variable using addition or subtraction. (Elimination for x) and (Elimination for y).	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Visual learning links:** **Lesson 1 and 2: System of Equations** **Lesson 3: Representing Relations**
Lesson 3: Representing relations	I can represent relationships between variables using tables, graphs, equations, and verbal descriptions, and explain how the representations are connected.		
Lesson 4: Formative GRASP Part 2	I can solve, rearrange, and interpret algebraic equations by applying algebraic properties, explaining my reasoning, and justifying the impact of rounding on financial calculations.		
Teacher's notes/ Reminders	- Make use of the notebook provided. - Resources used in class will be in the team's channel. - Extra practice sheets can be found on the teams shared folder. - Enjoy your mid- term break. 		

Mc Graw hill: Can be accessed on Toddle:

Week 8

Technology Integration دمج التكنولوجيا	MAGMA, Khan Academy Teams Class Textbook/workbook.
Cross-curricular links لروابط بين المواد الدراسية	• Science: Writing and evaluating formulas (physics, chemistry); • Economics: Cost modelling, budget allocation, currency conversion • Geography/Social Studies: UAE urban development, sustainability, resource management
External Assessment Integration دمج التقييمات الخارجية	MAP – Common core 6+
Wellbeing/ ATL Skills ة النفسية / أساليب التعلم	Thinking skills: Critical thinking: evaluating models; Transfer: applying algebraic reasoning to new contexts Structured debates on expression form; model critique (Slide 9); debatable inquiry questions

	Communication skills: Writing to explain mathematical reasoning; presenting to an audience Two-column equation solving; written explanations on slides; 4–6-minute pitch Self-management skills: Organization: managing a multi-part project; Time management: meeting pitch deadlines Project journal; work periods with structured milestones; checklist in task document
Standards المعايير	• A.REI.3, N.Q.1, N.Q.2 • A.CED.4, A.REI.1, N.Q.1 • A.CED.3, A.REI.3 • A.CED.3, A.REI.1, A.REI.3
Inquiry/ TOK Question البحث والاستقصاء أسئلة	How can you solve an equation with the variable on each side?
Success Criteria (Measurable) معايير النجاح	**Lesson 1 and 2:** • Students Must: All students must be able to solve system of equation by eliminating the x-coefficient using addition or subtraction. • Students should: Most students should be able to check if the values of the variables satisfy the two equations. • Students could: Some students could translate a real-life situation into a system of two equations **Lesson 3:** • Students Must: Represent a relationship using a table, graph, and equation. • Students Should: Explain how the table, graph, and equation represent the same relationship • Students should: Justify which representation is most useful for a given situation. Use a real-world context to create and represent a relationship. **Lesson 4:** • Students must: 1. Solve for a quantity using the given properties. 2. Rearrange a literal equation using valid algebraic steps. 3. Round numbers correctly to the required precision. 4. Show my mathematical working clearly. • Students should: 1. Explain why each algebraic step is valid. 2. Compare the financial impact of rounding up vs. down. 3. Use appropriate mathematical vocabulary and notation. 4. Check that my answers are reasonable • Students could: 1. Solve a system of two equations independently. 2. Use more than one strategy and compare which is most efficient.

	3. Give a clear justification using mathematical evidence. 4. Connect my calculations to a realistic real-world financial situation.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Volunteering التطوع Respect الاحترام History التاريخ
	التطبيقImplementation: National Identity Link - Students explore the four UAE sector choices (Tourism, Renewable Energy, Transport, Housing) through a brief gallery of real UAE projects
