Week 10: 9 November 2026 to 13 November 2026

Subject: MYP Design **Grade: 7**

Unit Title: Designing Ethical AI Systems – Creating the Solution (Criterion C)

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Differentiation	Resources and links for Parents
Lesson 1 (W11.1): Planning the AI Prototype/ Simulation: Design Stages	I can construct a logical plan, in clear design stages, for building my AI prototype or simulation. • **MUST:** Plan the design stages needed to build the AI prototype or simulation. • **SHOULD:** Give each stage a realistic time, resources and a test point. • **COULD:** Identify a risk to the plan and a contingency.	**Formative:** Ongoing formative evidence – teacher observation, questioning and a planning check (unweighted). **Differentiation:** MUST / SHOULD / COULD tiers; partly completed plan template, stage cards and sentence starters for students who need support.	• Toddle: lesson slides and the Week 10 student worksheet (Part A – build plan) • Ask your child to show you their plan and explain the 6 design stages and how long each will take
Lesson 2 (W11.2): Building the AI Prototype/ Simulation (Part 1)	I can follow my plan to build the first stages of my AI prototype or simulation, using technical skills carefully. • **MUST:** Build the first stages of my prototype by following my plan. • **SHOULD:** Test my prototype with new inputs and record the results. • **COULD:** Explain a change I made while building, and why.	**FORMATIVE 1 of 2 (Criterion C):** Prototype Build Check – teacher feedback against Criterion C strands i–ii (unweighted; feeds into the final Criterion C summative). **Differentiation:** MUST / SHOULD / COULD tiers; step-by-step build guide and test table with sentence starters provided for support.	• Toddle: Formative 1 task sheet, worksheet Parts B–D and Criterion C rubric • Google Teachable Machine: teachablemachine.withgoogle.com • Encourage your child to show you their AI prototype and explain how they tested it
Homework	• Complete the build plan (Worksheet Part A: stages, time, resources and test points) if not finished in class. • Finish the Lesson 2 test table and change log (Worksheet Parts C–D) and upload screenshots of the build to Toddle.		
Teacher's notes/ Reminders	• Lesson 2 is Formative 1 of 2 – students need a charged laptop/Chromebook (and webcam for Route A). • Students must not use photos or voices of other students to train their AI – objects, drawings or their own voice (with permission) only. • The Week 10 build is the starting point for Building Part 2 and refining the prototype using feedback in Week 11 (Formative 2 of 2).		

Week 10

Technology Integration	Google Teachable Machine (training and testing an image/sound model), Google Slides / Canva / Scratch for rule-based simulations, and Toddle for the digital worksheet and build evidence; rules for using AI tools safely and responsibly.
Cross-curricular links	Mathematics (accuracy as fractions and percentages), Science (fair testing and recording results), Art & Design (screens, models and visual communication).
External Assessment Integration	Not applicable this week.
Wellbeing/ ATL Skills	• Self-management (organisation): planning design stages and managing time realistically. • Thinking (critical thinking): testing the prototype and improving it from the results. • Wellbeing: safe and responsible use of data – protecting our own and others' privacy.
Standards	• MYP Design Criterion C (i): construct a logical plan outlining the efficient use of time and resources. • MYP Design Criterion C (ii): demonstrate technical skills when making the solution. • CS.MS.1.2; CS.MS.5.3
Inquiry/ TOK Question	How can I design and build an AI system that is accurate, fair and safe for the students in my school?
Success Criteria (Measurable)	The student has met the learning targets by: • Planning all 6 design stages needed to build the AI prototype or simulation, with a time, resources and a test point for each. • Building Stages 1–3 of the prototype by following the plan, and recording at least 5 test results.
National Identity Domain	**Culture – Promotion of:** technology, innovation and responsible, ethical artificial intelligence that support the UAE National Strategy for Artificial Intelligence 2031 and a future-ready, knowledge-based economy. **Values –** responsible digital citizenship, respect for privacy, fairness and critical thinking.
