Week: 8 (19-23 October 2026)

الأسبوع #: من - إلى

Subject/الموضوع: Physics **Unit Titleعنوان الوحدة: Mechanic in 2 dimensions** **Grade11: الصف**

Lessonsالحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formativeتكويني/ Summativeختامي / Differentiationالتمايز	Resources and links for Parents المصادر و الروابط المخصصة لأولياء الأمور
Lesson 1 الحصة 1: Introduction to Friction	• I can define friction, distinguish static and kinetic friction, and identify factors affecting friction.	1.1 Flexible display of information (size, color, font, layout). 2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.2 Highlight big ideas, patterns, and critical features using organizers and examples.	Class notes and friction examples on Teams; calculator and notebook.
Lesson 2 الحصة الثانية Calculating Friction	• I can calculate kinetic friction using Fk = μk FN and maximum static friction using Fs,max = μs FN on horizontal surfaces.	1.1 Flexible display of information (size, color, font, layout). 2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.2 Highlight big ideas, patterns, and critical features using organizers and examples.	Friction practice worksheet and class notes on Teams; calculator.
Lesson 3 الحصة الثالثة Summative Revision	• I can review assessed concepts and equations and apply problem-solving strategies independently.	1.1 Flexible display of information (size, color, font, layout). 2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.2 Highlight big ideas, patterns, and critical features using organizers and examples.	Assessment scope, revision sheets and previous formatives on Toddle/Teams.
Lesson 4 الحصة الرابعة Summative Assessment	• I can demonstrate conceptual understanding, mathematical application and problem-solving skills in the summative assessment.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports.	Revise the shared assessment scope; bring calculator and required stationery.
Homework الواجبات	• Complete friction practice and revise class notes, worksheets and previous formative assessments.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. .	Teams class materials and Toddle formative resources.
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	Bring a calculator, notebook and stationery to every lesson. Parents: support regular revision and check the shared assessment scope and assessment date.		

Week 8 #الأسبوع

Technology Integration دمج التكنولوجيا	Teams: class notes and practice resources. Toddle: formative resources and assessment information.
Cross-curricular links الروابط بين المواد الدراسية	Mathematics: rearranging equations, units and proportional relationships. Engineering: grip, braking and surface design.
External Assessment Integration دمج التقييمات الخارجية	Practise interpreting force diagrams, selecting equations and explaining solutions in structured assessment questions.
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	Thinking: analyse forces and justify methods. Communication: explain reasoning and give peer feedback. Self-management: plan revision and check units. Wellbeing: build confidence through supported practice.
Standards المعايير	• Forces and motion: analyse frictional forces and use mathematical models to explain motion on horizontal surfaces.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How can friction be both useful and a problem in everyday life?
Success Criteria معايير النجاح **(Measurable)**	MUST (DOK 1): Define friction and identify static and kinetic friction. SHOULD (DOK 2): Calculate kinetic friction and maximum static friction using the appropriate coefficient and normal force. COULD (DOK 3): Analyse a real-life friction problem and justify a solution using force diagrams and calculations. **Revision:** recall equations, solve structured questions and justify methods. **Summative**: demonstrate the assessed outcomes independently.
National Identity Domain مجالات الربط بالهوية الوطنية	Belonging الإنتماء Global Understanding التفاهم العالمي Arabic Language اللغة العربية
	Area: Innovation and Infrastructure المجال
	Implementation: Discuss how tyre grip and braking support road safety in the UAE, and how engineers balance useful التطبيق friction with energy losses in transport and infrastructure.
