Week 12: 16th – 20th November 2026

Subject: Mathematics (Accelerated) Unit Title: Geometry and Transformations – GRASPS Performance Task Grade: 7

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1: GRASPS Launch Review and Planning	Lesson 1: I can interpret the GRASPS requirements, select a creative puzzle or challenge format, and organize a realistic project plan.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	
Lesson 2: GRASPS Mathematical Checkpoint	Lesson 2: I can develop accurate geometry questions, solve them with clear steps, and check that the answers match my project solutions.		
Lesson 3: GRASPS Design and Peer Feedback	Lesson 3: I can build and test an interactive math challenge using geometry and transformations and improve it using peer feedback.		
Lesson 4: GRASPS Refinement and Presentation	Lesson 4: I can explain and justify my mathematics, present a complete GRASPS product, and reflect on how well it meets the assessment criteria.		
Teacher's notes/ Reminders	• Review the GRASPS task sheet and success criteria on Toddle. • Use class notes and Teams resources to verify each mathematical solution. • Show all steps, prepare an accurate answer key and test every puzzle or challenge. • Submit the completed GRASPS through Toddle as instructed by the teacher.		

Technology Integration دمج التكنولوجيا	Toddle: GRASPS brief, help sheet, assessment criteria and submission. Microsoft Teams: geometry notes and worked examples. Digital presentation or design tools (optional).
Cross-curricular links لروابط بين المواد الدراسية	Design / Art: create a clear and appealing puzzle, board game or escape challenge. ICT: organize a digital interactive presentation. Language: write precise instructions and explain mathematical reasoning.
External Assessment Integration دمج التقييمات الخارجية	MAP – Common Core Grade 7/8: problem solving, geometry, transformations and mathematical communication.
Wellbeing/ ATL Skills ة النفسية/ أساليب التعلم	Thinking: construct and test a sequence of mathematically valid challenges. Communication: explain steps, instructions and reasoning clearly. Self-management: plan tasks, monitor progress and meet checkpoints. Social: offer and use constructive peer feedback. Creative thinking: design an original, accessible problem-solving experience.

Standards المعايير	7.G.A.1 – Solve problems involving scale drawings. 7.G.A.2 – Draw geometric shapes with given conditions; analyze triangles. 7.G.A.3 – Describe two-dimensional figures from cross-sections. 7.G.B.5 – Use angle relationships to solve problems. 8.G.A.2 – Understand congruence through rotations, reflections and translations. Relevant standards are applied as appropriate to each student's GRASPS design.
Inquiry/ TOK Question البحث والاستقصاء أسئلة	How can we use geometry and transformations to design a creative challenge that requires accurate mathematical reasoning?
Success Criteria (Measurable) معايير النجاح	Lesson 1 – GRASPS planning Must: Identify task expectations and choose an appropriate concept. Should: Outline a clear sequence of challenges and a work plan. Could: Design an original storyline and multiple connected challenges. Lesson 2 – Mathematical checkpoint Must: Write solvable questions and accurate worked solutions. Should: Explain reasoning using correct mathematical terminology. Could: Include linked multi-step problems and verify alternative methods. Lesson 3 – Design and feedback Must: Assemble a playable or understandable draft. Should: Test the activity and address peer feedback. Could: Refine visual clarity, creativity and challenge progression. Lesson 4 – Final refinement Must: Complete the product, instructions and answer key. Should: Present and justify mathematical choices. Could: Evaluate the design and propose evidence-based improvements.
National Identity Domain مجالات الربط بالهوية الوطنية	Volunteering التطوع Respect الاحترام History التاريخ
	المجال Area: UAE Innovation and Future Skills – develop creative mathematical challenges inspired by UAE landmarks, architecture and design. Respect: collaborate and provide constructive feedback.
	التطبيق Implementation: Students may integrate geometric patterns, angles, scale drawings or transformations drawn from UAE architecture into a GRASPS game or interactive challenge.
