Abu Dhabi City Campus Daily/Weekly Planner

Week 12: 16–20 November 2026

Subject: MYP Design **Unit Title:** Designing Ethical AI Systems – Creating the Solution (Criterion C) Grade: 7

Lessons	Learning targets	Assessment tools and strategies Formative / Differentiation	Resources and links for Parents
Lesson 1 (W12.1): **Building the AI Prototype / Simulation (Part 2)**	I can continue building my AI prototype or simulation, following the planned design accurately.	**FORMATIVE 2 of 2 (Criterion C strand iii):** Prototype Progress Check, teacher feedback (unweighted; feeds into the Prototype summative). **Support:** step-by-step build guide and progress log. **Challenge:** explain a technical decision with a test result, and adapt the plan if a problem appears.	Toddle: lesson slides, build worksheet and progress log. **Parents:** Ask your child to show how far the prototype has progressed and to explain one technical decision they made.
Lesson 2 (W12.2): **Refining the Prototype Using Feedback**	I can refine my AI prototype/simulation using teacher and peer feedback.	**Unweighted** peer/self-review, improved product and individual exit reflection. Record the change made and why. **Support:** change-log template and self-review checklist. **Challenge:** test the change with new inputs and explain its effect.	Toddle: lesson slides, change log and exit reflection. **Parents:** Ask your child to show you one change they made to the prototype and explain why it helps.
Homework	Finish any unfinished change-log entry or exit reflection.	Self-check the prototype and log against the success criteria.	Teacher to confirm homework for Week 12.
Teacher's notes / Reminders	**Bring** a charged iPad or laptop and your prototype. Train the AI only with objects, drawings or your own voice – **never** photos or voices of other students. Formative 2 of 2 feeds into Summative 3 in Week 13.		

Abu Dhabi City Campus Daily/Weekly Planner

Week 12

Technology Integration	Google Teachable Machine (image or sound model) and Canva, Google Slides or Scratch for rule-based simulations. Screenshots of build stages and the change log uploaded to Toddle.
Cross-curricular links	Computer Science; Engineering.
External Assessment Integration	Not applicable to these lessons. Formative 2 of 2 covers Criterion C strand iii.
Wellbeing / ATL Skills	ATL: self-management (following the plan), critical thinking (testing and improving) and communication. Wellbeing: safe, respectful use of data and protecting privacy.
Standards	Lesson 1: MYP Criterion C (iii); CS.MS.1.2; CS.MS.5.3 Lesson 2: MYP Criterion C; CS.MS.1.2; CS.MS.5.3
Inquiry / TOK Question	How does understanding AI systems through data and algorithms allow designers to evaluate their accuracy, fairness and ethical impact on users and communities?
GRASPS Task	**Goal:** build an ethical AI prototype for a school problem. **Role:** AI designer. **Audience:** classmates, teachers and the DL & AI Team. **Situation:** the school only uses safe, fair AI. **Product:** AI prototype/simulation. **Standards:** Criterion C.
Success Criteria (Measurable)	**Lesson 1:** MUST: Complete a further stage of the build. SHOULD: Explain a technical decision made during construction. COULD: Adapt the plan in response to a problem encountered. **Lesson 2:** MUST: Identify one change needed from feedback. SHOULD: Make the improvement to the prototype. COULD: Explain why the improvement makes the prototype more effective.
National Identity Domain	Technology, innovation, artificial intelligence and ethical digital design support the UAE's vision for a secure, innovative, knowledge-based economy; responsible digital citizenship, critical thinking and future-ready skills.
