Week # 12: 16–20 November 2026

Subject / الموضوع: Design **Unit Title / عنوان الوحدة: Web Design Fundamentals** **Grade 9 (MYP Year 5) / الصف التاسع**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Design Measurable Tests	I can design two measurable tests by linking them to my Criterion B criteria.	Check · Do both tests produce useful data? Peer-check the task and pass rule. 6.2 Support planning with templates, strategy prompts, and modeled thinking. 8.1 Make goals clear, visible, and supported by short-term objectives.	Existing GitHub website, Criterion B specification and the test log.
Run User Tests	I can collect reliable data by giving two users the same website tasks.	Check · Compare records for both users. Peer feedback and teacher check of the log. 8.3 Foster collaboration and community with structured group roles and supports. 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools.	GitHub website link, test log and a timer where needed.
Evaluate and Refine	I can judge my site using test data, explain one improvement and describe its effect on users.	Summative · Submit the site and evaluation. Use the shared MYP Design rubric. 5.3 Build fluency with graduated scaffolds and models. 8.4 Provide mastery-oriented feedback that emphasizes growth and improvement.	GitHub site link, test log, Criterion B specification and MYP Design rubric.
Homework الواجبات	Complete the project evaluation in class.		Have your GitHub website link and Criterion B specification ready.
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	Use one test log across the week. For example, ask two users to find the Contact page from Home. Record who finds it within 20 seconds and compare the results with the agreed pass rule. Use a worked test example, role cards and sentence starters. Record users as A and B.		

Technology Integration دمج التكنولوجيا	Open the existing multi-page GitHub project. Test the published GitHub Pages link if available, or use the class preview. Record results in one log and capture screenshots when they help explain a finding.
Cross-curricular links الروابط بين المواد الدراسية	English and Media Studies — judge clarity for readers. Design — test navigation and layout. Business — consider how a website helps a local organisation or small business reach its audience.
External Assessment Integration دمج التقييمات الخارجية	School summative · Personal Multi-Page Website Project. In Lesson 3, peer-check D.i–D.iv, then submit the website link and evaluation with the test log.
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	Critical thinking — make judgements from data. Communication — give users neutral instructions and give specific peer feedback. Self-management — use a checklist to track D.i–D.iv.
Standards المعايير	MYP Year 5 Design · Criterion D Evaluating. D.i Design tests that generate data. D.ii Critically evaluate success against the specification. D.iii Explain improvements. D.iv Explain impact on the intended audience. Colorado Computer Science · PG 7, Computer Programming. CS.HS.3.2 — Programming involves solving computational problems. CS.HS.3.4 — Stakeholder requirements and feedback support product quality.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How can I design and develop a personal multi-page website that uses structure and design principles to communicate information effectively to a specified audience?
Success Criteria معايير النجاح **(Measurable)**	Lesson 1 · MUST plan two tests linked to B.i, each with a task, measure and pass rule. SHOULD explain why each measure fits its criterion. COULD refine the plan after a partner tries it. Lesson 2 · MUST test with two users and log comparable results. SHOULD explain one finding. COULD retest a task on a different screen or after clarifying the instructions. Lesson 3 · MUST judge each key criterion using data or mark it untested, explain one improvement and describe one benefit and one limitation for users. SHOULD connect each claim to evidence and user needs. COULD make and retest a priority fix.
National Identity Domain مجالات الربط بالهوية الوطنية	**Citizenship** Belonging الإنتماء | **Values** Respect الاحترام | **Culture** Arabic Language اللغة العربية
	Area / المجال Responsible digital citizenship and accessible web design in the UAE.
	Implementation / التطبيق Consider a UAE community audience. Use anonymous feedback and consider bilingual labels.
