Week 8 Unit: AI-Assisted Product Prototyping and Campaign Design Grade: 8

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Differentiation	Resources and links for Parents
Lesson 1 (W6.1) Finalising and Presenting the UAE Product Design Brief	I can present a complete, evidence-based design brief that clearly explains my UAE problem, research and product direction.	Summative 1: UAE Product Design Brief, assessed against Criterion A strands i–iv, maximum 8. Teacher observation and a final check provide unweighted formative feedback before submission.	Ask your child: What UAE problem does your product address? Who will use it? What research supports the need for it? Review their design brief together.
Lesson 2 (W6.2) Peer Feedback and Design Brief Refinement	I can use peer and teacher feedback to refine my design brief before moving into idea development.	Unweighted peer and self-review, an improved brief and an individual exit reflection. Students record the change made and why. Support: feedback prompts and a checklist. Challenge: explain how changes strengthen the brief.	Ask your child to show one improvement and explain why it helps. Discuss how they use AI as a tool while keeping control of their design decisions.
Home support	Discuss whether the product meets the needs of its intended users.	Encourage your child to explain their evidence and respond thoughtfully to feedback.	Use class notes and the design brief. Check the toddle for any assigned homework.
Teacher notes and reminders	Please refer to the school learning platform for task instructions and confirmed deadlines.		

Week 8

Technology Integration	AI supports research and product direction while students retain creative control and evaluate its suggestions.
Cross-curricular links	Business and English.
External Assessment Integration	Not specified for these lessons.
Wellbeing/ ATL Skills	Research, critical thinking, communication, collaboration and reflection. Students give constructive feedback and make responsible design decisions.
Standards	MYP Design Criterion A strands i–iv; Lesson 2 focuses on A.iv. CS.DA.1; CS.DA.2; CS.AP.2.
Inquiry/ TOK Question	How can I use AI as a tool, while keeping creative control of my design decisions, to prototype and promote a product that solves a real problem in the UAE?
Success Criteria (Measurable)	Lesson 1 MUST: Complete a brief stating the problem, users and product direction. SHOULD: Justify the need for the product using research evidence. COULD: Analyse how existing products or AI examples informed the brief. Lesson 2 MUST: Identify one strength and one area for improvement. SHOULD: Make at least one improvement to the brief. COULD: Explain how the improvement strengthens the brief.
National Identity Domain	Technology, innovation, AI and ethical digital design support the UAE vision for a secure, innovative, knowledge-based economy. Students develop responsible digital citizenship and future-ready skills.
