Week 12: 16–20 November 2026

Subject: Cybersecurity **Unit Title: Evidence & Security Logs** **Grade: 12**

Lessons	Learning targets	Assessment tools and strategies Formative / Summative / Differentiation	Resources and links for Parents
Lesson 1 Security logs and evidence	Learning Target: I can interpret simplified security evidence to explain what may have happened. Focus: logs, timestamps, login records, alerts and indicators of compromise (IOCs).	Formative (unweighted): identify facts in a fictional login log, annotate a suspicious alert and explain a possible IOC. Support/LLD: colour-coded log cards; match timestamp, username and alert icons; multiple choice. Core: extract relevant facts and explain unusual entries. Extension: justify a preliminary sequence of events.	Teacher-made fictional login records and alert screenshots; log glossary; highlighters; LMS. No real credentials or personal data.
Lesson 2 Analyse incident evidence	Learning Target: I can interpret simplified security evidence to explain what may have happened. Focus: apply, analyse and extend log interpretation; identify suspicious patterns and construct an evidence-based timeline.	FORMAL FORMATIVE T1-FF4 — Security Logs & Incident Evidence Analysis (10% of term). Support/LLD: simplified visual log with MCQ and matching; assessment accommodations per school policy. Core: identify relevant records, possible IOCs and a short timeline. Extension: justify which evidence supports or weakens a conclusion.	Fictional incident evidence pack; simplified log extracts; assessment task and marking rubric; LMS submission.
Homework	Review key terms: timestamp, log, alert, login record and IOC. Practise highlighting facts and ordering three fictional events.	Formative: vocabulary retrieval and a three-event timeline; teacher feedback.	LMS revision glossary, visual log cards and fictional incident timeline.
Teacher's notes / Reminders	Two Cybersecurity contact lessons only this week. Lesson 2 includes formal formative T1-FF4 (10%). Use fictional logs and school-approved accommodations; avoid real passwords, personal records and live attacks.

Week 12

Technology Integration	LMS quizzes, projected sample login logs, highlighted timestamp records and digital incident-timeline diagrams.
Cross-curricular links	Mathematics: interpreting time/order and patterns. Computer Science: event logs, access and system behaviour. English: evidence-based explanations.
External Assessment Integration	T1-FF4 — Security Logs & Incident Evidence Analysis (10% of term); extract facts, identify possible IOCs and build a preliminary timeline.
Wellbeing / ATL Skills	Careful observation, critical thinking, ethical data handling, collaboration, responsible reporting and resilience.
Standards	CS.HS.4.1; CS.HS.4.3 — Evidence & Security Logs (official Week 12 scope).
Inquiry / TOK Question	How can a small set of security records help us explain an incident without jumping to conclusions?
Success Criteria (Measurable)	MUST: Extract relevant facts from logs. SHOULD: Identify suspicious patterns and possible IOCs. COULD: Build and justify a preliminary incident timeline.
National Identity Domain	UAE digital resilience and responsible citizenship: use evidence to protect people, data and systems in a secure knowledge-based economy.
