Week 11: 9–13 November 2026
الأسبوع 11: من 9 - إلى 13 نوفمبر 2026

Subject / الموضوع: Biology **Unit Title / عنوان الوحدة: Module 23 – The Nervous System – الجهاز العصبي** **Grade / الصف: 10**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Session 1 الحصة الأولى The Senses الحواس	**DOK 3 – Analyze:** I can analyze how sensory receptors in the eyes, ears, nose, tongue and skin detect stimuli, and explain how this information reaches the brain to be interpreted.	2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. **Formative:** sense organ labelling task and Toddle quiz	Kindly check Toddle/Teams for the lesson PPT and practice sheet.
Session 2 الحصة الثانية Formative Assessment / Lab التقييم التكويني / المختبر	**DOK 3 – Investigate and explain:** I can carry out a reaction-time investigation, analyze my data, and use my knowledge of the nervous system and the senses to explain my results.	3.3 Guide processing with explicit steps, chunking, and interactive models. 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools. 4.1 Provide alternatives for physical action and methods of response. **Formative:** Module 23 quiz and reaction-time lab (ruler-drop test)	Kindly check Toddle/ Teams for the lab sheet
Homework الواجبات	•		
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	Session 1 completes the nervous system topic with the senses. Session 2 is a formative assessment: a short Module 23 quiz followed by a reaction-time lab using the ruler-drop test. The formative results show what each student needs to review before the summative assessment, which is assessed with MYP Criterion A.		

Week 11 الأسبوع 11

Technology Integration دمج التكنولوجيا	Videos of how the eye and ear work, optical illusion images, online reaction-time tests, and Toddle for the quiz and second-chance feedback.
Cross-curricular links الروابط بين المواد الدراسية	Mathematics (averages and graphs of reaction-time data), Visual Arts (optical illusions) and Physical and Health Education (reaction time in sport).
External Assessment Integration دمج التقييمات الخارجية	Aligned to NGSS HS-LS1-2 and HS-LS1-3, and MAP Growth Science (Life Sciences).
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	Wellbeing: protecting our senses (safe headphone volume, eye breaks from screens). ATL: thinking (analysing lab data) and collaboration (working in lab pairs).
Standards المعايير	• **HS-LS1-2:** Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms. • **HS-LS1-3:** Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis. • **MYP Criterion A:** Knowing and understanding. • **MYP Criteria B and C (formative practice):** Inquiring and designing; processing and evaluating, through the reaction-time lab.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	**Inquiry:** How do our senses and nervous system work together to help us respond to the world around us? **TOK:** Optical illusions show that our senses can be fooled. How far can we trust our senses as a source of knowledge?
Success Criteria معايير النجاح **(Measurable)**	The student has met the learning targets by: لقد حقق الطالب/الطالبة أهداف التعلم من خلال: **Session 1 – The Senses** • **MUST (DOK 1):** I can name the five senses, their sense organs, and the type of receptor in each (photoreceptors, mechanoreceptors, chemoreceptors, thermoreceptors, pain receptors). • **SHOULD (DOK 2):** I can explain the path from stimulus to receptor, sensory neuron and brain, using the eye or the ear as an example. • **COULD (DOK 3):** I can compare how two senses work together, such as taste and smell, and justify with evidence why some areas of the skin are more sensitive than others. **Session 2 – Formative Assessment / Lab** • **MUST (DOK 1):** I can answer questions on neurons, the organization of the nervous system and the senses, and record my lab data in a table with units. • **SHOULD (DOK 2):** I can calculate my average reaction time and explain the path of the impulse from sensory receptor to the central nervous system to the muscle.

	• **COULD (DOK 3):** I can analyze my data to draw a conclusion, evaluate my method (practice, distractions, repeats) and suggest improvements.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Belonging الإنتماء Compassion التعاطف Heritage التراث
	المجالArea: Health, safety and wellbeing of the UAE community, and care for People of Determination.
	التطبيقImplementation: • Session 1: students compare the human eye with the falcon's eye, linking the senses to Emirati falconry heritage, and discuss how the UAE supports People of Determination with visual or hearing impairments. • Session 2: students link their reaction-time results to UAE road safety: why using a phone while driving slows responses. • Arabic key terms: الحواس (senses), المستقبلات الحسية (sensory receptors), المنبه (stimulus), زمن رد الفعل (reaction time), الخلية العصبية الحسية (sensory neuron).
