Week # 11: 9-13 November 2026

Subject/:الموضوع Business Management **Unit Title: عنوان الوحدة: Operations** **Gradeالصف : 12DP**

Lessonsالحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formativeتكويني/ Summativeختامي / Differentiation التمايز	Resources and links for Parents المصادر و الروابط المخصصة لأولياء الأمور
Lesson 1: الحصة 1 Break-even charts & margin of safety تحليل التعادل وهامش الأمان	• I can **distinguish between total contribution and contribution per unit**. • I can **calculate the break-even quantity, profit or loss and margin of safety**. • I can **construct and analyse a fully labelled break-even chart** (Company ABC worked example).	3.3 Guide processing with explicit steps, chunking, and interactive models. 6.3 Facilitate organization with graphic organizers, prompts, and note-taking guides. 2.2 Clarify syntax/structure and highlight relationships in text, formulas, diagrams.	• Ask your child to explain what "break-even" means and show you their break-even chart. • Key formulas: contribution per unit = price − variable cost; BEQ = fixed costs ÷ contribution per unit.
Lesson 2 الحصة الثانية Price & cost changes, target profit 5.5 تغيّر السعر والتكلفة والربح المستهدف	• I can **explain the effects of changes in price or cost** on break-even quantity, profit and margin of safety (graphically and numerically). • I can **calculate target profit output, target profit and target price**. • I can **explain the limitations of break-even analysis** as a decision-making tool.	8.2 Vary challenge level with differentiated tools, resources, and difficulty. 5.3 Build fluency with graduated scaffolds and models. 8.4 Provide mastery-oriented feedback that emphasizes growth and improvement.	• Discussion idea: if a home-based meal business in the UAE raised its prices, would it break even sooner? What might go wrong?
Lesson 3 الحصة الثالثة & Supply chains 5.6 stock control (HL) سلاسل التوريد ومراقبة المخزون	• I can **describe the local and global supply chain process**. • I can **explain the difference between just-in-time (JIT) and just-in-case (JIC)** stock control. • I can **construct and interpret stock control charts** (lead time, buffer stock, reorder level and reorder quantity).	2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 3.2 Highlight big ideas, patterns, and critical features using organizers and examples. 6.3 Facilitate organization with graphic organizers, prompts, and note-taking guides.	• Video – Just-in-time (JIT) methodology: Open link • Discussion idea: how do UAE ports such as Jebel Ali help local shops get their stock?

Lesson 4 الحصة الرابعة **Capacity 5.6, productivity & make-or-buy (HL)** الإنتاجية وقرار التصنيع أو الشراء	• I can **calculate capacity utilization rate and defect rate**. • I can **calculate labour productivity, capital productivity, productivity rate and operating leverage**. • I can **calculate and compare cost to buy (CTB) and cost to make (CTM)** to make a make-or-buy decision.	7.2 Make learning relevant, authentic, and connected to students' backgrounds. 5.3 Build fluency with graduated scaffolds and models. 9.3 Develop self-assessment and self-reflection with tools, charts, and feedback displays.	• Discussion idea: do you make French fries at home or buy them? How is that like a business's make-or-buy decision? • Please encourage your child to practise the formulas from this week with a calculator.

Week # 11 الأسبوع#

Technology Integration دمج التكنولوجيا	• Interactive slides; InThinking online exam practice; YouTube clip on JIT methodology. • Online/textbook research to find and interpret a stock control chart.
Cross-curricular links الروابط بين المواد الدراسية	• **Mathematics:** linear equations, graphs and percentages (break-even charts, capacity and productivity ratios). • **TOK:** How can we 'know' how much to produce? Can we truly 'know' consumer demand?
External Assessment Integration دمج التقييمات الخارجية	• IB DP Business Management **Paper 2** style quantitative questions (AO2, AO4) and evaluation (AO3). • InThinking exam practice and Cambridge case study 32.3; IB command terms (define, calculate, construct, explain).
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	• Thinking skills – applying formulas, interpreting break-even and stock control charts • Communication skills – explaining answers in groups • Research skills – finding and interpreting a stock control chart
Standards المعايير	• IB DP Business Management **5.5 Break-even analysis** (SL/HL) and **5.6 Production planning** (HL). • Assessment objectives: AO2 (application), AO3 (evaluation), AO4 (quantitative skills).
Inquiry/ TOK Question البحث والاستقصاء أسئلةTOK	• **Inquiry:** How does a change in selling price or costs affect break-even quantity, margin of safety and profit? • **TOK:** Can we truly 'know' consumer demand?
Success Criteria معايير النجاح **(Measurable)**	• **Must:** Distinguish total contribution from contribution per unit; explain JIT vs JIC and supply chains. • **Should:** Construct and analyse break-even and stock control charts; calculate capacity utilization and defect rate. • **Could:** Analyse price/cost changes and break-even limitations; calculate productivity, operating leverage, CTB and CTM.
National Identity Domain مجالات الربط بالهوية الوطنية	Belonging الإنتماء Global Understanding التفاهم العالمي Value Heritage التراث
	المجال Area: UAE entrepreneurship (e.g. home-based meal businesses) and UAE ports and logistics hubs such as Jebel Ali Port.
	التطبيق Implementation: Students apply break-even analysis to a local UAE start-up and explore how UAE ports connect businesses to global supply chains.
