Week 10: 2nd- 6th November 2026

Subject / الموضوع: Biology **Unit Title / عنوان الوحدة: Module 23 – The Nervous System** **Grade / الصف: 10**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Session 1 الحصة الأولى **M23 L1: Structure of the Nervous System** تركيب الجهاز العصبي	**DOK 3 – Analyze:** I can analyze how the structure of a neuron is related to its function in carrying nerve impulses through the body.	2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 5.3 Build fluency with graduated scaffolds and models. **Formative:** neuron labelling task	Kindly check Toddle and teams for the lesson PPT and practice sheet.
Session 2 الحصة الثانية **M23 L2: Organization of the Nervous System** تنظيم الجهاز العصبي	**DOK 3 – Compare:** I can compare the divisions of the nervous system and analyze how they work together to control a response, such as a reflex.	3.2 Highlight big ideas, patterns, and critical features using organizers and examples. 6.3 Facilitate organization with graphic organizers, prompts, and note-taking guides. 8.3 Foster collaboration and community with structured group roles and supports. **Formative:** nervous system concept map and reflex arc diagram	Kindly check Toddle and teams for the lesson PPT and practice sheet.
Homework الواجبات			
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	This week students begin Module 23: The Nervous System. Session 1 covers the structure of a neuron and how nerve impulses travel; Session 2 covers how the nervous system is organized and how reflexes work. Please encourage your child to review the key vocabulary at home: neuron, dendrite, axon, myelin sheath, synapse, neurotransmitter, central nervous system, peripheral nervous system, reflex arc.		

Week 10 الأسبوع 10

Technology Integration دمج التكنولوجيا	Videos and interactive 3D models of the neuron and brain, and Toddle for study-guide practice with second-chance feedback.
Cross-curricular links الروابط بين المواد الدراسية	Physical and Health Education (reaction time in sport), Mathematics (reaction-time data and averages) and Psychology (how the brain controls behaviour).
External Assessment Integration دمج التقييمات الخارجية	Aligned to NGSS HS-LS1-2 and HS-LS1-3, and MAP Growth Science (Life Sciences).
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	Wellbeing: how sleep and stress affect the nervous system (sympathetic "fight or flight" response). ATL: thinking (comparing structures and functions) and communication (explaining processes with labelled diagrams).
Standards المعايير	• **HS-LS1-2:** Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms. • **HS-LS1-3:** Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis. • **MYP Criterion A:** Knowing and understanding.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	**Inquiry:** How does the structure of the nervous system allow the body to respond quickly to changes inside and outside it? **TOK:** How do scientists know what each part of the brain does when they cannot observe thoughts directly?
Success Criteria معايير النجاح **(Measurable)**	The student has met the learning targets by: لقد حقق الطالب/الطالبة أهداف التعلم من خلال: **Session 1 – M23 L1: Structure of the Nervous System** • **MUST (DOK 1):** I can label the parts of a neuron (dendrites, cell body, axon, myelin sheath, axon terminals) and state the function of each part. • **SHOULD (DOK 2):** I can explain how a nerve impulse travels along a neuron and across a synapse using neurotransmitters. • **COULD (DOK 3):** I can justify how the myelin sheath and the many dendrites make signals faster and more efficient, and predict what happens when myelin is damaged. **Session 2 – M23 L2: Organization of the Nervous System** • **MUST (DOK 1):** I can identify the central nervous system (brain and spinal cord) and the peripheral nervous system (nerves). • **SHOULD (DOK 2):** I can describe the somatic and autonomic systems, and the sympathetic and parasympathetic divisions, with an example of each. • **COULD (DOK 3):** I can analyze a reflex arc, explain the path of the impulse from receptor to effector, and justify why reflexes are faster than voluntary responses.
National Identity Domain	Belonging الإنتماء Compassion التعاطف Arabic Language اللغة العربية

مجالات الربط بالهوية الوطنية	**المجالArea:** Health, safety and wellbeing of the UAE community, and care for People of Determination.
	التطبيقImplementation: • Session 1: students discuss how damage to neurons affects daily life, and how the UAE supports People of Determination with inclusion and care. • Session 2: students link reflexes and reaction time to UAE road safety: why using a phone while driving slows responses, and how seatbelts and helmets protect the brain and spinal cord. • Arabic key terms: الخلية العصبية (neuron), المشبك العصبي (synapse), الجهاز العصبي المركزي (central nervous system), الجهاز العصبي الطرفي (peripheral nervous system), الفعل المنعكس (reflex).
