Abu Dhabi City Campus Daily/Weekly Planner

Week 10: 2–6 November 2026

Subject: Design | Unit Title: Web Design Fundamentals | Grade: 9

Lessons	Learning targets	Assessment tools and strategies Formative / Differentiation	Resources and links for Parents
Lesson 1 Planning and Starting My Website	I can start creating my website by constructing a production plan and applying HTML skills.	**Formative checkpoint C.i-C.ii:** review the plan and first making evidence. **Support:** plan-row frame and worked HTML example. **Challenge:** justify task order and plan a fallback for a likely technical problem.	Chosen Criterion B design; production-plan template; existing HTML editor; student workbook. **Parents:** Ask your child to explain the first making step and the resources needed.
Lesson 2 Building Linked Website Pages	I can build my website by following my plan and using HTML to connect the planned pages.	**Formative checkpoint C.ii-C.iii:** observe a working navigation route and review a second technical skill. **Support:** model link code and check filenames. **Challenge:** diagnose a fault and justify an accessibility improvement.	Production plan; existing HTML files; navigation example; code and preview screenshots. **Parents:** Ask your child to show a page link and the route back to Home.
Lesson 3 Completing and Demonstrating My Website	I can present a functioning website by completing my plan and justifying changes to my design and production plan.	**ONE formative submission covering C.i-iv:** plan, technical evidence, website, whole-site demonstration and justified changes. **Support:** before/after/reason prompts and a submission checklist. **Challenge:** use evidence to justify a change against an alternative.	Final website and assets; function-check table; change log; Criterion C task rubric. **Parents:** Ask what changed from the original design and why the change was needed.
Homework	Complete unfinished making evidence and save all website files.	Self-check the portfolio against C.i-iv before the single submission.	Review feedback and check that all submitted pages and assets open.
Teacher's notes / Reminders	Continue the chosen personal website in the existing class HTML editor. Submit ONE Criterion C formative portfolio after Lesson 3. Use appropriate images and protect personal information.		

Week 10

Technology Integration	Use the existing HTML editor on iPads to build and preview linked pages. Capture code and results. Demonstrate the whole website through a short recording or a teacher-observed live demonstration.
Cross-curricular links	English: clear audience-focused content and reasons. Design: structure and accessibility. Business: audience needs. Media Studies: responsible communication and image use.
External Assessment Integration	No external assessment task specified. One classroom formative task covers Criterion C i-iv.
Wellbeing / ATL Skills	ATL: self-management, problem-solving, critical thinking and communication. Follow a realistic plan, respond respectfully to feedback and ask for help when debugging.
Standards	PG 7 / Computer Programming - CS.HS.3.2: The process of programming involves solving computational problems. MYP Design Criterion C: C.i production plan; C.ii technical skills; C.iii following the plan and function; C.iv justified changes.
Inquiry / TOK Question	How can I design and develop a personal multi-page website that uses structure and design principles to communicate information effectively to a specified audience?
Success Criteria (Measurable)	**Lesson 1** **MUST:** Sequence making steps and begin a planned page. **SHOULD:** Include realistic time, named resources and a check that a peer can follow. **COULD:** Justify the order and add a fallback for a likely technical problem. **Lesson 2** **MUST:** Create or improve linked pages and save the work. **SHOULD:** Use consistent navigation and capture a skill linked to a plan step. **COULD:** Diagnose a broken link independently and justify a more accessible choice. **Lesson 3** **MUST:** Show the website functioning and record actual design and plan changes. **SHOULD:** Link the website to the plan and explain reasons for changes. **COULD:** Use evidence to justify a change against an alternative and explain its effect on the audience.
National Identity Domain	Connect website creation to UAE innovation and digital transformation. Practise responsible digital citizenship through privacy, accessible navigation, appropriate content and efficient use of digital resources.
