Week 10: 2nd – 6th November 2026

Subject: Integrated Math I **Unit Title: Unit 1: Foundations of algebraic relationships** **Grade: 9**

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1: Standard form and intercepts	I can show that the slope of a straight line never changes, and I can use this idea to create the formula y = mx + b and understand that every point on the line fits this equation.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Visual learning links:** **Lesson 1** Standard form and intercepts **Lesson 2:** Slope and intercept form **Lesson 3:** Graphing linear funtions **Lesson 4:** Rate of change
Lesson 2: Slope and intercept form.	I can the slope of a straight line never changes, and I can use this idea to create the formula y = mx + b and understand that every point on the line fits this equation.		
Lesson 3: Graphing linear functions.	I can graph linear functions using equations, tables of values, and coordinate points, and interpret the slope and y-intercept to explain the relationship between two variables.		
Lesson 4: Rate of change.	Understand that the graph of a two-variable linear equation is the set of all its solutions plotted in the coordinate plane.		
Teacher's notes/ Reminders	- Make use of the notebook provided. - Resources used in class will be in the team's channel. - Extra practice sheets can be found on the teams shared folder. - **Please note that the upcoming summative will be written during your math lesson. Your teacher will share the study guide and answer key on toddle and teams. The scheduled date of the summative is determined by your math teacher. Some lessons will be moved due to the scheduling of the upcoming exam.** **Mc Graw hill: Can be accessed on Toddle:**		

Week 8

Technology Integration دمج التكنولوجيا	MAGMA Mc Graw hill Teams Class Textbook/workbook.
Cross-curricular links لروابط بين المواد الدراسية	• Science: Writing and evaluating formulas (physics, chemistry); • Economics: Cost modelling, budget allocation, currency conversion • Geography/Social Studies: UAE urban development, sustainability, resource management
External Assessment Integration دمج التقييمات الخارجية	MAP – Common core 6+
Wellbeing/ ATL Skills ة النفسية / أساليب التعلم	Thinking skills: Critical thinking: evaluating models; Transfer: applying algebraic reasoning to new contexts Structured debates on expression form; model critique (Slide 9); debatable inquiry questions Communication skills: Writing to explain mathematical reasoning; presenting to an audience

	Two-column equation solving; written explanations on slides; 4–6-minute pitch Self-management skills: Organization: managing a multi-part project; Time management: meeting pitch deadlines Project journal; work periods with structured milestones; checklist in task document
Standards المعايير	F.IF.1, F.IF.2 F.IF.5, A.REI.10
Inquiry/ TOK Question البحث والاستقصاء أسئلة	How can you solve an equation with the variable on each side?
Success Criteria (Measurable) معايير النجاح	**Lesson 1:** I must: identify the x and y intercept in the equation. I should: Rearrange linear equations into standard form. I could: Convert equations into standard and slope intercept form. **Lesson 2:** I must: identify whether a relationship is a function by checking if each input has exactly one output. I should: complete tables of values and plot points on a coordinate plane. I could: calculate the average rate of change using values from a table or a symbolic rule. **Lesson 3:** I must: create a table of values by substituting values for (x). I should: explain how the slope describes the rate of change. I could: apply linear functions to real-world situations and interpret what the graph represents. **Lesson 4:** I must: identify variables, inputs, outputs, and ordered pairs. I should: create a table of values for a two-variable equation. I could: plot points correctly on a coordinate grid with labeled axes and scales.
National Identity Domain مجالات الربط بالهوية الوطنية	Volunteering التطوع Respect الاحترام History التاريخ التطبيقImplementation: National Identity Link - Students explore the four UAE sector choices (Tourism, Renewable Energy, Transport, Housing) through a brief gallery of real UAE projects
