Week : October 19-October 25, 2026

الأسبوع #: من - إلى

Subject/الموضوع: Science **Unit Title عنوان الوحدة:** Unit 1 Lesson 2 Property Changes in Chemical Reactions **Grade الصف: 7**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Lesson 1 Mystery Substance Challenge	**DOK 3 – Analyse**: I can analyse property data to identify an unknown substance and justify my conclusion with scientific evidence.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools.	Inspire Science Unit 1 Workbook (provided by school) and kept in classroom until the end of the unit. Inspire Science Digital Access (not yet available) Teams Class Materials W5 Folder
Lesson 2 Identifying Property Changes in Chemical Reactions	**DOK 2 – Skills and Concepts**: I can identify evidence that a chemical reaction has occurred by observing changes in the properties of substances.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.1 Activate prior knowledge using organizers, links, and pre-teaching. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	PPT Presentations, Reading Essentials and Notebook
Lesson 3 What Happens to Atoms During a Chemical Reaction	**DOK 2 – Skills and Concepts**: I can use models to show how atoms rearrange to form new substances during a chemical reaction.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Lesson 4 Conservation of Matter in Chemical Reactions	**DOK 3 – Strategic Thinking:** I can use models and data to explain how matter is conserved during a chemical reaction.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Homework الواجبات	Review lesson notes		

Teacher's notes/ Reminders **ملاحظات المعلم والتذكير**	Please encourage your child to review and practice Science regularly each week using the resources available in their class **Microsoft Teams - class material folder which is organized by week**. The presentations, readings, videos, practice activities, etc. posted in Teams are the primary learning materials and should be used throughout the unit to support understanding and achievement. Science study guides will provide **basic *assessment information, topics, and expectations***; however, they are intended as a guide only and will **not contain detailed study materials,** these are found in the class teams. **Effective preparation for graded formatives and summatives requires students to actively engage with the learning materials provided in their class teams.** Thank you for partnering with us to support your child's learning and success.

Week # الأسبوع#

Technology Integration دمج التكنولوجيا	Inspire Science Digital Interactives, PPT
Cross-curricular links الروابط بين المواد الدراسية	**ELA** – Scientific vocabulary and evidence-based explanations using models and observations.
External Assessment Integration دمج التقييمات الخارجية	MAP
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	**Thinking – Critical Thinking:** Analyse and evaluate evidence of property changes to explain how substances react chemically and how atoms rearrange to form new substances. **Research – Information Literacy:** Gather and interpret scientific information from investigations, models, and data to identify evidence of chemical reactions and explain how atoms and mass are conserved during chemical changes.
Standards المعايير	**MS-PS1-2:** Analyze and interpret data on the properties of substances before and after the substances interact to determine if a chemical reaction has occurred..
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How do atoms rearrange to form new substances in a chemical reaction?
Success Criteria معايير النجاح **(Measurable)**	**Lesson 1:** **Must- DOK 1 – Identify:** I can identify relevant properties in the data for known and unknown substances. **Should - DOK 2 – Compare:** I can compare the properties of the unknown substance with known substances to determine possible matches. **Could - DOK 3 – Justify:** I can justify the identity of the unknown substance using multiple pieces of relevant scientific evidence. **Lesson 2:** **Must – DOK 1 (Recall):** I can identify signs of a chemical reaction from given examples. **Should – DOK 2 (Skills and Concepts):** I can explain how changes in properties provide evidence of a chemical reaction. **Could – DOK 3 (Strategic Thinking):** I can justify whether a chemical reaction has occurred using evidence from observations.

	Lesson 3: **Must – DOK 1 (Recall):** I can identify atoms and molecules in simple models of substances. **Should – DOK 2 (Skills and Concepts):** I can use a model to show how atoms rearrange when bonds break and new bonds form. **Could – DOK 3 (Strategic Thinking):** I can explain how the rearrangement of atoms produces new substances with different properties. **Lesson 4:** **Must – DOK 1 (Recall):** I can identify that atoms are conserved during a chemical reaction. **Should – DOK 2 (Skills and Concepts):** I can compare the numbers of each type of atom before and after a chemical reaction. **Could – DOK 3 (Strategic Thinking):** I can use models and evidence to justify why the total mass remains the same in a closed system during a chemical reaction.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Belonging الإنتماء Global Understanding التفاهم العالمي Heritage التراث
	المجال Area: Understanding how chemical reactions change the properties of substances and contribute to scientific, industrial, and technological applications in the UAE.
	Implementation: التطبيق Students appreciate the UAE's commitment to scientific innovation and sustainable development by understanding how chemical reactions transform substances, how matter is conserved, and how these principles support local industries, renewable energy technologies, healthcare, and environmental protection.
