Week 9: 26–30 October 2026

Subject: MYP Design **Unit Title: Fair, Smart, Ethical AI for UAE Smart Cities** **Grade: 6**

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Differentiation	Resources and links for Parents
Lesson 1 **Success Criteria & Two AI Design Ideas** (B.i–B.ii)	I can create success criteria, develop two simple AI design ideas and use feedback to identify the stronger solution.	**FORMAL FORMATIVE 3 (unweighted)** • Check: 3 criteria, Ideas A and B, and one peer-feedback comment. • Support: model sketches, word bank and sentence starters. • Challenge: explain fairness, accuracy, safety or bias.	• Criterion A research / identified smart-city problem. • Student design worksheet and lesson slides (provided in class).
Lesson 2 **Final AI Design & Planning Diagram** (B.iii–B.iv)	I can justify my final AI design choice and create a clear, labelled planning diagram showing how my solution works.	• Check: final design justification and refined system flowchart. • Support: planning template and guided questions. • Challenge: clear data flow, algorithm logic and ethical safeguards.	• Design Ideas A and B plus peer feedback. • Planning-diagram template and example (provided in class).
Homework	No compulsory homework. Students may finish labels or review their success criteria if needed.		
Teacher's notes / Reminders	Students are completing Criterion B in two lessons. Work may be completed on paper or digitally. Bring or access your Criterion A research. Formative checks 3 and 4 provide feedback only and are not weighted.		

Week 9 | Grade 6 | MYP Design | Criterion B

Technology Integration	PowerPoint, model AI system flowchart and optional digital design sketch; paper-based alternatives available.
Cross-curricular links	Mathematics: sequencing and logical data flow. Visual Arts: labelled diagrams. Moral Education: fairness and responsible decision-making.
External Assessment Integration	No external assessment this week. MYP Criterion B formative checks are feedback-only.
Wellbeing/ ATL Skills	ATL: creative and critical thinking, communication, collaboration, reflection. Wellbeing: inclusive design, respectful peer feedback and responsible use of AI.
Standards	MYP Design Criterion B: B.i develop design specifications; B.ii present feasible design ideas; B.iii justify the chosen design; B.iv create accurate planning drawings/diagrams.
Inquiry/ TOK Question	How can a fair, smart and ethical AI system solve a real UAE smart-city challenge and support responsible societal development?
Success Criteria (Measurable)	**Lesson 1** MUST: List at least 3 success criteria and sketch two labelled AI design ideas (A and B). SHOULD: Explain how each idea works and compare them using the success criteria. COULD: Justify which idea is better by considering fairness, accuracy, safety and bias. **Lesson 2** MUST: Select one final design, explain why it was chosen and create a labelled input → process → output diagram. SHOULD: Include key features, data flow and simple algorithm steps. COULD: Justify the choice using success criteria and refine the diagram so another student can understand how the AI system works independently.
National Identity Domain	Culture: Explore smart-city solutions in Abu Dhabi, Dubai and Masdar City. Values: Fairness, safety, sustainability, ethical innovation and responsible digital citizenship.
