Week 9: 26th – 30th October 2026

Subject: Mathematics Course 2 Unit Title: Proportional Reasoning and Percentages Grade: 7

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson1: Percentages and Proportional Reasoning	I can connect percentages to ratios and proportional relationships, use tape diagrams and proportions to solve percent problems, and explain my reasoning.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Practice links/review links:** **Lesson1:** Percentages and Proportional Reasoning
Lesson 2: Summative Review 1	I can review geometry skills and explain how to select and apply the correct method to solve problems.		
Lesson 3: Summative Review 2			
Lesson 4: Summative Assessment	I can independently demonstrate my understanding and apply appropriate mathematical strategies to solve assessment questions accurately.		
Teacher's notes / Reminders	Week 9 plan serves as a general guide and may vary between ADC Boys and Girls Schools depending on school schedules, planned trips, and student progress. ADC Girls School will continue and complete the remaining lessons according to their teacher's plan. Students should follow their respective teacher's instructions for any updates or adjustments. Students should bring their student book . Lesson resources and revision materials are shared through toddle and teams. McGraw Hill can be accessed through Toddle.		

Technology Integration دمج التكنولوجيا	Teams; Toddle and McGraw Hill digital textbook; student textbook and copybook; Magma Math where assigned.
Cross-curricular links لروابط بين المواد الدراسية	Design and financial literacy: calculate discounts, service charges, VAT and costs while budgeting for the Chill Zone project.
External Assessment Integration دمج التقييمات الخارجية	Skills-based review and preparation aligned to the school summative assessment.
Wellbeing/ ATL Skills ة النفسية/ أساليب التعلم	Thinking: choose strategies and recognize proportional structure. Communication: explain mathematical reasoning precisely. Self-management: revise independently, check solutions and manage assessment time. Social: collaborate constructively during review activities.
Standards المعايير	7.RP.A.2; 7.RP.A.3; 7.EE.B.4; 7.G.A.1–3; 7.G.B.5–6; 8.EE.C.7 (as covered in the unit).
Inquiry/ TOK Question البحث والاستقصاء أسئلة	How can percentages help us use proportional reasoning to make fair comparisons and responsible spending decisions?
Success Criteria (Measurable) معايير النجاح	Lesson 1 — Percentages and Proportional Reasoning All: identify the percent, whole and part and represent a simple percent using a ratio or tape diagram. Most: use proportional reasoning to calculate a percentage, discount or fee and explain the method. Some: solve and justify multi-step percent problems connected to a budget. Lesson 2 & 3— Geometry Review Lesson 4 — Summative Assessment All: attempt all accessible questions and show working. Most: independently apply appropriate strategies accurately. Some: justify and verify solutions to complex questions.
National Identity Domain مجالات الربط بالهوية الوطنية	Volunteering التطوع Respect الاحترام History التاريخ Area: Financial literacy and UAE national development. Connect percentages to shopping discounts, UAE VAT, construction costs and responsible project budgeting.
