Week 10: November 2-November 6, 2026

الأسبوع #: من - إلى

Subject/الموضوع: Science **Unit Title عنوان الوحدة:** Grasp Task **Grade الصف: 6**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Lesson 1 GRASP Task Introduction: Understanding Expectations and Planning for Success	I can understand the GRASP task requirements, plan my approach, and create a response that meets the assessment criteria.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools.	Inspire Science Unit 1 Workbook (provided by school) and kept in classroom until the end of the unit. Inspire Science Digital Access (not yet available) Teams Class Materials W5 Folder
Lesson 2 Developing the Powerpoint – Part 1	I can create the first part of a PowerPoint presentation that explains key scientific concepts related to cells.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.1 Activate prior knowledge using organizers, links, and pre-teaching. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	PPT Presentations, Reading Essentials and Notebook
Lesson 3 Developing Part 2 of the GRASP Task	I can develop Part 2 of the GRASP Task by applying my knowledge of cells to explain scientific concepts.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Lesson 4 Developing the Model and Reviewing Progress	I can develop a scientific model that represents cells and evaluate my progress toward completing the GRASP Task.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook

Homework **الواجبات**	Review lesson notes
Teacher's notes/ Reminders **ملاحظات المعلم والتذكير**	**Session 1 for Grade 6 boys will be taken for Summative Assessment** **GRASPS TASK IS A SUMMATIVE ASSESSMENT AND WILL BE GRADED FOR MYP CRITERIA A, B, C AND D** Please encourage your child to review and practice Science regularly each week using the resources available in their class **Microsoft Teams - class material folder which is organized by week**. The presentations, readings, videos, practice activities, etc. posted in Teams are the primary learning materials and should be used throughout the unit to support understanding and achievement. Science study guides will provide **basic *assessment information, topics, and expectations***; however, they are intended as a guide only and will **not contain detailed study materials,** these are found in the class teams. **Effective preparation for graded formatives and summatives requires students to actively engage with the learning materials provided in their class teams.** Thank you for partnering with us to support your child's learning and success.

Week # الأسبوع#

Technology Integration دمج التكنولوجيا	Inspire Science Digital Interactives, PPT
Cross-curricular links الروابط بين المواد الدراسية	**ELA** – Scientific vocabulary and evidence-based explanations using models and observations.
External Assessment Integration دمج التقييمات الخارجية	MAP
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	**Thinking – Critical Thinking:** Analyse and organize scientific information to explain how cells are the basic units of life, using evidence and scientific reasoning to develop the GRASP Task display board, PowerPoint presentation, and model. **Research – Information Literacy:** Gather, evaluate, and present relevant scientific information, diagrams, and evidence about cells to develop accurate explanations and communicate scientific concepts effectively through the GRASP Task display board, PowerPoint presentation, and model.
Standards المعايير	**NGSS MS-LS1-1**: Conduct an investigation to provide evidence that living things are made of cells, either one cell or many different numbers and types of cells. **NGSS MS-LS1-2:** Develop and use a model to describe the function of a cell as a whole and how its parts contribute to its function.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How can we use scientific evidence and models to explain that all living things are made of cells?
Success Criteria معايير النجاح **(Measurable)**	**Session 1 for Grade 6 boys will be taken for Summative Assessment** **Lesson 1:** **Must – DOK 1:** I can identify the GRASP task requirements, deliverables, and assessment criteria. **Should – DOK 2:** I can explain what I need to do and organize the steps needed to complete the task successfully. **Could – DOK 3:** I can develop a plan and justify how my approach will meet the assessment criteria and demonstrate my learning. **Lesson 2:** **Must – DOK 1:** Identify the key information required for Part 1 of the GRASP Task. **Should – DOK 2:** Organize scientific information, images, and examples into clear and well-structured slides. **Could – DOK 3:** Explain how the information and evidence in my slides support the idea that living things are made of cells.

	Lesson 3: **Must – DOK 1:** Identify the requirements and key concepts needed to complete Part 2. **Should – DOK 2**: Organize relevant information, diagrams, and examples to address the task requirements. **Could – DOK 3**: Use scientific evidence and reasoning to explain and support my ideas about cells. **Lesson 4:** **Must – DOK 1:** Identify the materials and components needed for my model. **Should – DOK 2:** Construct or develop my model to represent the required cellular structures and concepts accurately. **Could – DOK 3:** Evaluate my model and explain how it represents scientific ideas about cells, identifying any improvements needed.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Belonging الإنتماء Global Understanding التفاهم العالمي Heritage التراث المجال Area: Students recognize the importance of maintaining a healthy lifestyle, understanding the human body, and appreciating scientific knowledge that supports community health and wellbeing in the UAE. **Implementation:** **National Identity (Citizenship – Informed Decision-Making):** Students will apply their understanding of cell theory by researching, organizing, and presenting scientific information through a display board, PowerPoint presentation, and model demonstrating that all living things are made of cells.
