Week 10 : November 2-November 6, 2026

الأسبوع #: من - إلى

Subject/الموضوع: Science **Unit Title عنوان الوحدة:** Unit 1 Lesson 3 Energy Changes in Chemical Reactions **Grade الصف: 7**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Lesson 1 Introduction to the GRASP Task	I can understand the GRASP Task requirements and plan how to communicate my scientific understanding through the required project components.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools.	Document/s in MS Teams Folder called GRASPS Unit 1
Lesson 2 Endothermic and Exothermic Reactions: Energy In or Out?	I can distinguish between endothermic and exothermic reactions by analyzing temperature changes and evidence of energy transfer.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.1 Activate prior knowledge using organizers, links, and pre-teaching. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	PPT Presentations, Reading Essentials and Notebook
Lesson 3 Energy Changes in Chemical Reactions	I can explain how energy is released or absorbed during chemical reactions and use models to describe the relationship between chemical bonds and energy changes.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Lesson 4 GRASP Task Check-in: Reviewing Progress and Next Steps	I can evaluate my progress on the GRASP Task and identify the next steps needed to complete and improve my work.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	Document/s in MS Teams Folder called GRASPS Unit 1
Homework الواجبات	Review lesson notes		

Teacher's notes/ Reminders **ملاحظات المعلم والتذكير**	**Grade 7A and 7B Boys will be using one session for the summative assessment (Ms. Aya).** **GRASPS TASK IS A SUMMATIVE ASSESSMENT AND WILL BE GRADED FOR MYP CRITERIA A, B, C AND D** Please encourage your child to review and practice Science regularly each week using the resources available in their class **Microsoft Teams - class material folder which is organized by week**. The presentations, readings, videos, practice activities, etc. posted in Teams are the primary learning materials and should be used throughout the unit to support understanding and achievement. Science study guides will provide **basic *assessment information, topics, and expectations***; however, they are intended as a guide only and will **not contain detailed study materials,** these are found in the class teams. **Effective preparation for graded formatives and summatives requires students to actively engage with the learning materials provided in their class teams.** Thank you for partnering with us to support your child's learning and success.

Week # الأسبوع#

Technology Integration دمج التكنولوجيا	Inspire Science Digital Interactives, PPT
Cross-curricular links الروابط بين المواد الدراسية	**ELA** – Scientific vocabulary and evidence-based explanations using models and observations.
External Assessment Integration دمج التقييمات الخارجية	MAP
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	**Thinking – Critical Thinking:** Analyse and interpret evidence from investigations, temperature observations, and scientific models to explain how chemical reactions release or absorb energy and to distinguish between exothermic and endothermic reactions. **Research – Information Literacy:** Gather, evaluate, and interpret scientific information, experimental data, and models to explain energy changes during chemical reactions and communicate evidence-based conclusions through scientific explanations and the GRASP Task.
Standards المعايير	**MS-PS1-6**. Undertake a design project to construct, test, and modify a device that either releases or absorbs thermal energy by chemical processes.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	Why do some reactions give off thermal energy and some absorb thermal energy?
Success Criteria معايير النجاح **(Measurable)**	**Lesson 1:** **Must — DOK 1:** Identify the GRASP Task requirements and the sections that need to be completed. **Should — DOK 2:** Organize the information, resources, and tasks needed to complete the project. **Could — DOK 3:** Develop a plan to communicate scientific ideas clearly using appropriate evidence, explanations, and models. **Lesson 2:** **Must — DOK 1:** Define endothermic and exothermic reactions and identify whether energy is absorbed or released. **Should — DOK 2:** Classify reactions using temperature observations and explain how energy moves between the reaction and its surroundings. **Could — DOK 3:** Use experimental evidence to justify whether a reaction is endothermic or exothermic

	Lesson 3: **Must — DOK 1**: Identify whether a reaction releases or absorbs energy. **Should — DOK 2:** Interpret observations, temperature data, and models to explain energy changes in chemical reactions. **Could — DOK 3**: Construct a Claim-Evidence-Reasoning (CER) explanation supported by evidence to justify the energy change in a reaction. **Lesson 4:** **Must — DOK 1:** Identify the completed and unfinished sections of my GRASP Task. **Should — DOK 2:** Organize my work according to the task requirements and identify areas that need improvement. **Could — DOK 3:** Evaluate my scientific explanations, evidence, and models against the success criteria and justify the improvements I plan to make.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Conservation الحفاظ علي البيئة Global Understanding التفاهم العالمي Heritage التراث المجال Area: Students recognize the importance of understanding energy changes in chemical reactions and appreciate how energy transfer contributes to scientific innovation, industrial processes, sustainable energy solutions, and technological advancements in the UAE. Implementation: National Identity (Citizenship – Scientific Innovation and Sustainability): Students appreciate the UAE's commitment to scientific innovation and sustainable development by understanding how energy is released or absorbed during chemical reactions and how these energy changes support industrial processes, energy technologies, healthcare, and environmental sustainability in the UAE.
