Week 10: 02– 06 November 2026

Subject: Mathematics **Unit Title:** Linear Functions and Equations **Grade :** 8 Pre AP Algebra 1

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative/تكويني Summative /ختامي Differentiation التمايز	Resources and links for Parents المصادر و الروابط المخصصة لأولياء الأمور
Lesson 1: 1.5 Linear Functions **Lesson 2 1.5 Linear Functions** **Lesson 3: 1.5 Linear Functions** **Lesson 4 Summative Assessment**	• 1.1.3 Use algebraic notation to represent functions and sequences. • 1.1.4 Use function notation to determine inputs and outputs of functions. • 1.1.5 Construct and apply linear functions to solve problems given mathematical or applied contexts. • 1.1.5 I can calculate the constant rate of change of a linear relationship by using tables, graphs, equations, or coordinate points. • I can solve problems on Linear Functions and Arithmetic Sequences and apply my knowledge in a summative assessment setting.	1.1 Flexible display of information (size, color, font, layout). 2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.1 Make goals clear, visible, and supported by short-term objectives.	Reflection prompts, notebooks The resources will be available on student's Teams channel
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	**Formatives take place during lesson time, ALWAYS be prepared.** Bring your stationary: Penic/Pen and Calculator and be on time. **Remember** we will be using our notebooks. ***Devices will only be used on Friday's, unless otherwise communicated by your teacher.*** Communication takes place via **TEAMS** or **Toddle**. We will be introducing our AP Platform soon, **College Board** **Summative date: Thursday, November 5, 2026**		

Technology Integration دمج التكنولوجيا	Resources shared on Microsoft Teams, College Board
Cross-curricular links الروابط بين المواد الدراسية	**Science**: Measurement and unit conversions. **Physics**: Speed, rate, and proportional relationships. **Geography**: Metric and customary measurement systems. **Engineering**/Design: Using mathematical models to solve real-world problems.

External Assessment Integration دمج التقييمات الخارجية	All content is covered in AP Past Exams/ College Board Assessments
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	**Wellbeing:** • Confidence in solving real-world maths problems. • Resilience when learning from mistakes. • Collaboration through shared investigations and discussions. • Self-awareness by setting and reflecting on learning goals. **IB ATL Skills:** • **Thinking:** Analyze patterns and relationships. • **Communication:** Explain and justify mathematical reasoning. • **Research:** Collect, organize, and interpret data. • **Social:** Collaborate and discuss problem-solving strategies
Standards المعايير	• **A.CED.2** • **F.IF.3, 5** • **F.BF.1, 2** • **F.LE.2**
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How can different representations of a linear relationship help us understand and solve real-world problems?
Success Criteria معايير النجاح **(Measurable)**	Lesson 1 **All Students Must:** use algebraic and function notation to find inputs and outputs in a function. **Most Students Should:** represent functions and sequences using algebraic notation and identify patterns. **Some Students Could:** construct and apply linear functions to solve problems and determine the constant rate of change using tables, graphs, equations, or coordinate. Lesson 2: **All Students Must:** use algebraic and function notation to find inputs and outputs in a function. **Most Students Should:** represent functions and sequences using algebraic notation and identify patterns. **Some Students Could:** construct and apply linear functions to solve problems and determine the constant rate of change using tables, graphs, equations, or coordinate. Lesson 3: **All Students Must:** use algebraic and function notation to find inputs and outputs in a function. **Most Students Should:** represent functions and sequences using algebraic notation and identify patterns.

	▲ **Some Students Could:** construct and apply linear functions to solve problems and determine the constant rate of change using tables, graphs, equations, or coordinate. Lesson 4: ▨ **All Students Must:** solve questions involving algebra, linear functions and arithmetic sequences. ▧ **Most Students Should:** select and apply the appropriate mathematical methods to solve multi-step problems. ▲ **Some Students Could:** justify solutions and work accurately and effectively under summative assessment conditions.
