Week 6: October 19-October 23, 2026

الأسبوع #: من - إلى

Subject/الموضوع: Science **Unit Title عنوان الوحدة:** Unit 1 Lesson 4 Moving Materials **Grade الصف: 6**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Lesson 1 Removing Waste	**DOK 2:** I can explain how organisms remove wastes produced by their cells.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools.	Inspire Science Unit 1 Workbook (provided by school) and kept in classroom until the end of the unit. Inspire Science Digital Access (not yet available) Teams Class Materials W5 Folder
Lesson 2 Transport in Plants – Turning Over a New Leaf	**DOK 2:** I can explain how plants transport water and other materials using specialized structures.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.1 Activate prior knowledge using organizers, links, and pre-teaching. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	PPT Presentations, Reading Essentials and Notebook
Lesson 3 The Respiratory System – Just Breathe	**DOK 2:** I can explain how the respiratory system exchanges gases and supports material transport in animals.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Lesson 4 The Circulatory System – In a Heartbeat	**DOK 2:** I can explain how the circulatory system transports materials throughout the body.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Homework الواجبات	Review lesson notes		

Teacher's notes/ Reminders **ملاحظات المعلم والتذكير**	Please encourage your child to review and practice Science regularly each week using the resources available in their class **Microsoft Teams - class material folder which is organized by week**. The presentations, readings, videos, practice activities, etc. posted in Teams are the primary learning materials and should be used throughout the unit to support understanding and achievement. Science study guides will provide **basic *assessment information, topics, and expectations***; however, they are intended as a guide only and will **not contain detailed study materials,** these are found in the class teams. **Effective preparation for graded formatives and summatives requires students to actively engage with the learning materials provided in their class teams.** Thank you for partnering with us to support your child's learning and success.

Week # الأسبوع#

Technology Integration دمج التكنولوجيا	Inspire Science Digital Interactives, PPT
Cross-curricular links الروابط بين المواد الدراسية	**ELA** – Scientific vocabulary and evidence-based explanations using models and observations.
External Assessment Integration دمج التقييمات الخارجية	MAP
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	**Thinking – Critical Thinking:** Analyse evidence to explain how plant vascular, animal circulatory, and respiratory systems transport materials and work together to support the functioning of multicellular organisms. **Research – Information Literacy:** Gather and interpret scientific information to identify the structures involved in transport and explain the roles of water, oxygen, blood, and blood cells in moving materials throughout organisms.
Standards المعايير	**MS-LS1-3 (Life Science — Structure and Function):** Use argument supported by evidence for how the body is a system of interacting subsystems composed of groups of cells.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How are materials transported in multicellular organisms?
Success Criteria معايير النجاح **(Measurable)**	**Lesson 1:** **Must (DOK 1):** Identify wastes that organisms need to remove**.** **Should (DOK 2):** Explain how the body removes wastes**.** **Could (DOK 3):** Use evidence to explain how waste removal helps organisms survive. **Lesson 2:** **Must — DOK 1:** I can identify the main structures involved in transporting materials in plants. **Should — DOK 2**: I can explain how water moves from the roots to the leaves through the plant. **Could — DOK 3:** I can use evidence from the investigation to explain how plant structures help transport materials.

	Lesson 3: **Must — DOK 1:** I can identify the main structures of the respiratory system and their functions. **Should — DOK 2**: I can explain how oxygen enters the blood and carbon dioxide leaves the body. **Could — DOK 3:** I can explain how the respiratory and circulatory systems work together to transport gases throughout the body. **Lesson 4:** **Must — DOK 1:** I can identify the heart, blood, and blood vessels and state their basic functions. **Should — DOK 2**: I can explain how the heart pumps blood to transport oxygen, nutrients, and wastes. **Could — DOK 3**: I can measure and analyze heart rate data to explain how physical activity affects heart rate.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Belonging الإنتماء Global Understanding التفاهم العالمي Heritage التراث
	المجال Area: Understanding how transport systems support healthy living and wellbeing in the UAE
	التطبيق **Implementation:** National Identity (Citizenship – Informed Decision-Making): Students relate transport systems to breathing, fitness, and health awareness in UAE lifestyle practices.
