Emirates National Schools

Week 8: 19–23 October 2026

Subject: Computer Science 1 **Unit Title:** Introduction to Artificial Intelligence and Machine Learning **Grade:** 11

Lessons	Learning targets	Assessment tools and strategies Formative / Summative / Differentiation	Resources and links for Parents
Lesson 1 **AI decisions and human oversight**	Learning Target: Recognise why human oversight matters when AI is used to make decisions. Focus: Identify decisions that need human review and explain why an AI output should not be accepted automatically.	**Formative:** AI-or-human decision sort, think–pair–share and reason-giving exit check. **Summative:** Evidence for the AI Tool Selection & Evaluation Project. **Support:** Visual decision cards and sentence starters. **Core:** Explain two reasons for oversight in a scenario. **Extension:** Evaluate harms when a high-stakes AI decision is not reviewed.	Fictional automated decisions; human-in-the-loop flowchart; lesson vocabulary cards; LMS activities; family discussion on checking AI advice.
Lesson 2 **Reviewing AI output and its limitations**	Learning Target: Evaluate whether information produced by AI should be used. Focus: Spot errors, unsupported claims and possible bias; explain accuracy, privacy and fairness concerns.	**Formative:** AI Decision Review Activity (scope), annotated mock output and peer check. **Summative:** Evidence-based review incorporated into Week 8 project. **Support:** Highlighted evidence and a guided checklist. **Core:** Find problems and propose verification. **Extension:** Explain consequences and plan proportionate oversight.	Fictional AI responses; printed source evidence; reliability/ethics checklist; LMS reflection; home prompt on checking online claims.
Lesson 3 **Choosing the right AI tool**	Learning Target: Recognise the purpose and suitability of AI tools for specific outcomes. Focus: Match task requirements to tool capabilities, privacy safeguards and accuracy limits.	**Formative:** Tool-feature sorting, suitability matrix, mini-conference and oral justifications. **Summative:** Draft comparison for the AI Tool Selection & Evaluation Project. **Support:** A three-tool comparison table and guided choices. **Core:** Choose a tool and give evidence-based reasons. **Extension:** Compare trade-offs, accessibility and data-use implications.	Fictional AI tool profiles; task cards; suitability matrix; pre-approved school resources; optional discussion of responsible AI use.
Lesson 4 **AI tool selection and evaluation challenge**	Learning Target: Justify an appropriate AI tool for a real-world task while planning meaningful human oversight. Focus: Evaluate quality of outputs, explain tool fit and decide when a human must verify or override AI.	**Formative:** Teacher observation, peer critique, project rubric and self-assessment. **Summative:** AI Tool Selection & Evaluation Project (scope). **Support:** Structured tool-choice template and model rationale. **Core:** Independent choice with evidence and review steps. **Extension:** Defend trade-offs and revise the recommendation after new evidence.	Fictional school/business task brief; tool specification cards; evaluation rubric; LMS submission; family conversation about human responsibility for AI.
Homework	Review the meanings of human oversight, accuracy, bias and tool suitability. Compare two fictional AI tools for one everyday task and explain where human checking is essential.	**Formative:** Home comparison card, self-assessment using Must / Should / Could and retrieval quiz at the next lesson.	LMS review sheet and fictional tool profiles. No personal information, paid accounts or AI sign-up required.
Teacher's notes / Reminders	The official scope lists one Week 8 lesson: Lesson 7, "Human Oversight and Choosing the Right AI Tools". The four planner rows divide this focus into classroom teaching segments. Use fictional or approved examples; do not upload learners' personal data to AI tools. Check school AI-use policies before any live demonstrations.		

Week 8

Technology Integration	Teacher-led AI-output examples; pre-approved LMS resources; digital annotation and quizzes; fictional AI tool cards; structured evaluation matrices. Live AI access is optional, not required.
Cross-curricular links	Social Studies: human responsibility and decision-making in technology and society. Business Studies: selecting appropriate AI tools to improve efficiency and outcomes.
External Assessment Integration	Interpret AI scenarios, assess accuracy and appropriateness of outputs, compare tools against task requirements, and justify decisions with evidence and human-review safeguards.
Wellbeing / ATL Skills	Critical thinking; ethical judgement; data privacy; communication; collaboration; reflection; digital responsibility; identifying uncertainty; decision-making and self-management.
Standards	PG 11: Evaluate the uses of AI. Colorado Standard 5 — Artificial Intelligence; CS.HS.5.3: Using AI tools requires evaluation of results and assessment of their appropriateness for specific applications. Colorado Essential Skills: evaluate AI-produced information and decide whether it should be used.
Inquiry / TOK Question	Who should be accountable when an AI-assisted decision is inaccurate, biased or harmful, and how can we decide when human judgement must take priority?
Success Criteria (Measurable)	Week 8 success criteria (lesson-level adaptation of scope objectives): MUST: Identify a human-oversight need and describe the intended purpose of an AI tool. SHOULD: Evaluate a sample AI output for reliability and match an AI tool to a given task with reasons. COULD: Defend an AI-tool recommendation using evidence and propose a practical human review/override process.
National Identity Domain	UAE values: responsibility, innovation, trust and ethical technology use. Explore how responsible human-led AI evaluation advances the UAE's vision of an ethical, knowledge-based, future-ready society.
