Week 10: 2nd – 6th November 2026

Subject: Mathematics (Course 1) **Unit Title: Unit 2: Ratio Rates and percentages** **Grade: 6**

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1: **Understanding percentages**	I can calculate percents of quantities and find the whole by using ratios, fractions, or equations to represent percent as a rate per 100.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Visual learning links:** **Lesson 1:** Understanding percentages **Lesson 2:** Relate decimals and percentages **Lesson 3:** Estimate the percent of a number **Lesson 4:** Find and compare percentages or percentage of an amount
Lesson 2: **Relate Fractions Decimals and percentages**	I can convert between fractions, decimals, and percentages and use these equivalent representations to solve mathematical and real-world problems.		
Lesson 3: **Estimate the percent of a number.**	I can estimate the percent of a number by using benchmark percents, mental math, and compatible numbers to solve real-world problems.		
Lesson 4: **Find and compare with percentages.**	I can determine the percent of a number using different strategies, such as equivalent ratios, fractions, decimals, and proportional reasoning, to solve mathematical and real-world problems.		
Teacher's notes/ Reminders	- Make use of MAGMA – as this gives students extra practice. - Teaching and learning resources will be uploaded on teams in the shared files folder. Extra notes/practice will be provided in this folder. - Please check all grades in toddle. Please see if the Unit 1 GRASP has been submitted on toddle. **Mc Graw hill: Can be accessed on Toddle:**		

	 **MAGMA login: Students should know their Microsoft username and password (download the application to sign in with your QR code). Please go to your teacher for assistance.** **Please make use of MAGMA for extra practice.**

Technology Integration دمج التكنولوجيا	MAGMA Teams Class notebook/workbook.
Cross-curricular links لروابط بين المواد الدراسية	Science: Speed, density, and other rates; unit conversions in experiments Economics/Business: Discounts, profit, tax, and financial literacy Geography: Scale maps and population density Food Technology: Recipe scaling and proportions
External Assessment Integration دمج التقييمات الخارجية	MAP – Common core 6+
Wellbeing/ ATL Skills ة النفسية/ أساليب التعلم	Thinking Skills (Transfer & Application): Applying ratio reasoning to real-life situations (finance, measurement, scaling) Communication Skills: Representing relationships using multiple forms (tables, graphs, diagrams, equations) Research Skills: Interpreting real-world data involving rates (e.g., speed, price comparisons) Self-Management Skills: Selecting appropriate strategies (tables, diagrams, unit rates) to solve problems Social Skills: Discussing and justifying proportional reasoning with peers
Standards المعايير	6.RP.A.1 – Understand and use ratio language to describe relationships between quantities 6.RP.A.2 – Understand and interpret unit rates in real-world contexts 6.RP.A.3 – Use ratio and rate reasoning to solve real-world and mathematical problems 6.RP.A.3a – Represent equivalent ratios using tables and graphs 6.RP.A.3b – Solve problems involving unit rates (e.g., price, speed) 6.RP.A.3c – Find and use percent of a quantity in problem solving 6.RP.A.3d – Use ratio reasoning to convert measurement units
Inquiry/ TOK Question البحث والاستقصاء أسئلة	What is a fraction and why are they important?

Success Criteria (Measurable) معايير النجاح	**Lesson 1:** Students must: Identify a percentage as a rate out of 100. Students should: Solve real-world problems to find the whole when given a part and a percent. Students could: Create and solve multi-step real-world problems involving percents. **Lesson 2:** Students must: Convert fractions to decimals by dividing the numerator by the denominator. Students should: Compare and order values represented as fractions, decimals, and percentages. Students could: Apply these conversions to real-life situations, such as shopping discounts, budgeting, and interpreting data. **Lesson 3:** Students must: Estimate a percent of a number using a suitable strategy. Students should: Explain the strategy used to estimate a percent of a number. Students could: Explain how estimation can help make quick financial decisions in real-world situations. **Lesson 4:** Students must: Find the percent of a number by multiplying the number by the decimal equivalent. Students should: Solve real-world problems involving percentages, such as discounts, marks, and quantities. Students could: Apply percentages to real-life situations involving discounts, increases, and financial decisions.
National Identity Domain مجالات الربط بالهوية الوطنية	Volunteering التطوع Respect الاحترام History التاريخ
	المجالArea: Economic Growth: Population Studies: Use measures of center to analyze demographic data, such as age distributions in different Emirates. Health and Wellness: Use dot plots and histograms to represent health-related data, such as the prevalence of various sports and physical activities in the UAE.
	التطبيقImplementation: Social Studies: Develop statistical questions to investigate cultural practices and traditions in different regions of the UAE.
