Week 10: 2/11/2026 – 6/11/2026

Subject: Mathematics Course 3 **Unit Title: Exploring Transformations and Linear Relationships** **Grade : 8**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative/تكويني Summative /ختامي Differentiation التمايز	Resources and links for Parents المصادر و الروابط المخصصة لأولياء الأمور
Lesson 1: Solve linear equations	I can solve linear equations.	1.1 Flexible display of information (size, color, font, layout). 2.3 Support decoding of text and notation using tools, audio, and multiple representations. 8.1 Make goals clear, visible, and supported by short-term objectives.	MAGMA MATH: Students will check the posted assignments /lessons on Magma Girls 'campus: Students will check their materials on Files section on Teams.
Lesson 2: Distributive property and linear equation- Part 1	I can solve multi-steps linear equations.		
Lesson 3: Summative	Summative study guide and review sheet already shared on Teams/Toddle		
Lesson 4: Distributive property and linear equation- Part 2	I can solve word problems involving multi-steps linear equations.		
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	**Make sure your devices are fully charged.** **Bring your pencil case/calculator with you.** **Complete your extra practice on Magma Math App.** **Grade 8B math summative will be in week 10:** **Girls'campus:Thursday.5.11** **Boys'campus: As announced by the teacher.** **Study guide and review sheet for the summative have been shared on toddle/teams.**		

Technology Integration دمج التكنولوجيا	Resources shared on Teams

Cross-curricular links الروابط بين المواد الدراسية	Science Connection: Students explore how slope relates to the steepness of inclined planes and how it affects the force needed to move objects up a ramp. IT Connection: Students use GeoGebra or Desmos to construct similar triangles on a straight line and investigate how the rise/run ratio remains constant.
External Assessment Integration دمج التقييمات الخارجية	All content is covered in MAP
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	🧠 **Wellbeing** • Confidence in solving real-world measurement problems. • Resilience when learning from mistakes. • Collaboration through shared investigations and discussion. • Self-awareness by checking the reasonableness of solutions. 🌎 **IB ATL Skills** **Thinking:** solving problems using scale factors and proportional reasoning. **Communication:** explaining mathematical methods and solutions clearly. **Research:** interpreting scale drawings and real-world models. **Self-Management:** organising calculations accurately and efficiently. **Social:** discussing strategies and comparing solutions with others
Standards المعايير	8.F.A.1: Understand that a function is a rule that assigns each input exactly one output. 8.F.B.4: Construct a function to model a linear relationship between two quantities and interpret the rate of change and initial value MP3: Construct viable arguments and critique the reasoning of others. MP7: Look for and make use of structure.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How does the accuracy of a scale factor affect the final size and reliability of a real-world design? How can slope help us understand and compare rates of change in real-life situations? How can a graph help us identify and understand the unit rate in a proportional relationship? How can unit rates help us compare proportional relationships represented in different ways?
Success Criteria معايير النجاح **(Measurable)**	<u>Lesson 1:</u> 🟦 All students must be able to solve one step linear equations. 🔵 Most students should be able to solve multi-step linear equations.

	🔺 Some students could be able to solve real-life linear equations. Lesson 2: 🟦 All students must be able to solve multi-steps linear equations. 🔵 Most students should be able to apply distributive property then solve equations. 🔺 Some students could be able to solve real-life linear equation. Lesson 3: Summative:Study guide and review sheet already shared on Teams/Toddle. Lesson 4: 🟦 All students must be able to translate a real-life scenario into a one-step linear equation. 🔵 Most students should be able to translate a real-life scenario into multi-steps linear equation. 🔺 Some students could be able to design a real-life scenario about solving linear equations.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Belonging الإنتماء Respect الاحترام Heritage التراث
	Students connect slope and proportional relationships to **UAE roads, transport routes, and infrastructure**, strengthening their understanding of how mathematics supports their community. Students demonstrate respect by **collaborating, sharing mathematical strategies, and appreciating different approaches** when solving UAE real-world problems. Students explore proportional relationships through **UAE heritage contexts**, such as traditional architecture, falaj irrigation systems, and historical trade routes.
