Week 10: 9 November 2026 to 13 November 2026

Subject: MYP Design **Grade: 8**

Unit Title: AI-Assisted Product Prototyping & Campaign Design – Creating the Solution (Criterion C)

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Differentiation	Resources and links for Parents
Lesson 1 (W11.1): Planning the Prototype & Campaign Build: Stages, Time & AI Tool Use	I can construct a logical plan for building my hand-drawn prototype, AI visual prototype and advertisement campaign, managing my time effectively. • **MUST:** List the stages needed to build the prototype and campaign. • **SHOULD:** Allocate realistic time to each stage. • **COULD:** Identify a risk to the plan and a contingency.	**Formative:** Ongoing formative evidence – teacher observation, questioning and a planning check (unweighted). **Differentiation:** MUST / SHOULD / COULD tiers; planning template with sentence starters for students who need support.	• Toddle: lesson slides and the project planning template • Ask your child to show you their plan and explain how long each stage will take
Lesson 2 (W11.2): Creating the Hand-Drawn Conceptual Prototype (Original Design)	I can create an original, hand-drawn conceptual prototype of my product, demonstrating my own design decisions. • **MUST:** Produce a hand-drawn prototype of my product. • **SHOULD:** Label key features and how they meet a specification. • **COULD:** Explain a design decision made during the drawing process.	**FORMATIVE 1 of 2 (Criterion C):** Hand-Drawn Conceptual Prototype – teacher feedback against Criterion C strands i–ii (unweighted; feeds into the final Prototype & Campaign summative). **Differentiation:** MUST / SHOULD / COULD tiers; labelled example sketch provided for support.	• Toddle: Formative 1 task sheet and Criterion C rubric • Encourage your child to talk you through the features of their drawing
Homework	• Complete the project plan (stages and time per stage) if not finished in class. • Finish and label the hand-drawn prototype ready for Week 12.		
Teacher's notes/ Reminders	• Lesson 2 is Formative 1 of 2 – students need a pencil, eraser, ruler and coloured pencils. • The hand-drawn prototype is the starting point for the AI visual prototype in Week 12, so it must be the student's own original work.		

Week 10

Technology Integration	Digital planning template (timeline/Gantt chart) on Toddle; introduction to the AI tools that will be used to build the visual prototype and campaign, and the rules for using them responsibly.
Cross-curricular links	Business (product promotion and advertising), ICT (AI tools), Art & Design (sketching and visual communication).
External Assessment Integration	Not applicable this week.
Wellbeing/ ATL Skills	• Self-management (organisation): planning stages and managing time realistically. • Thinking (creative thinking): producing an original design idea. • Wellbeing: a realistic plan reduces project stress later in the unit.
Standards	• MYP Design Criterion C (i): construct a logical plan outlining the efficient use of time and resources. • MYP Design Criterion C (ii): demonstrate technical skills when making the solution. • CS.AP.1; CS.CS.1
Inquiry/ TOK Question	How can I use AI as a tool — while keeping creative control of my design decisions — to prototype and promote a product that solves a real problem in the UAE?
Success Criteria (Measurable)	The student has met the learning targets by: • Listing every stage needed to build the hand-drawn prototype, AI visual prototype and campaign, with a time allocated to each. • Producing an original, hand-drawn prototype with key features labelled against the specification.
National Identity Domain	**Culture – Promotion of:** technology, innovation, artificial intelligence and ethical digital design that support the UAE's vision for a secure, innovative, knowledge-based economy. **Values –** responsible digital citizenship, critical thinking and future-ready skills.

Week 12: 16 November 2026 to 20 November 2026

Subject: MYP Design **Grade: 8**

Unit Title: AI-Assisted Product Prototyping & Campaign Design – Creating the Solution (Criterion C)

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Differentiation	Resources and links for Parents
Lesson 1 (W12.1): Generating & Refining the AI Visual Prototype	I can generate and refine a high-quality AI visual prototype from my hand-drawn design, using AI tools appropriately. • **MUST:** Generate an AI visual prototype based on my hand-drawn design. • **SHOULD:** Refine the AI output through at least one further prompt/iteration. • **COULD:** Explain how the computing system (the AI tool) processed my input to produce the output.	**FORMATIVE 2 of 2 (Criterion C):** AI Visual Prototype & Iteration Log – teacher feedback against Criterion C strands i–iii (unweighted; feeds into the final Prototype & Campaign summative). **Differentiation:** MUST / SHOULD / COULD tiers; prompt-writing guide for students who need support.	• Toddle: Formative 2 task sheet, Iteration Log template and Criterion C rubric • Ask your child to compare their hand drawing with the AI version and explain what they changed and why
Homework	• Complete the AI Iteration Log (prompts used, changes made and reasons) on Toddle.		
Teacher's notes/ Reminders	• Students must bring their hand-drawn prototype from Week 10 – it is the basis for the AI visual prototype. • AI is used as a tool: design decisions must stay the student's own, and every prompt is recorded in the Iteration Log.		

Week 12

Technology Integration	AI image-generation tool used to turn the hand-drawn design into a visual prototype; Iteration Log completed digitally on Toddle.
Cross-curricular links	ICT (AI tools and computing systems), Art & Design (visual design and refinement).
External Assessment Integration	Not applicable this week.
Wellbeing/ ATL Skills	• Thinking (critical thinking): evaluating AI output against the design and specification. • Media literacy: using AI ethically and recording how it was used. • Wellbeing: responsible, balanced use of digital tools.
Standards	• MYP Design Criterion C (ii): demonstrate technical skills when making the solution. • MYP Design Criterion C (iii): follow the plan to create the solution, which functions as intended. • CS.CS.1; CS.AP.1
Inquiry/ TOK Question	How can I use AI as a tool — while keeping creative control of my design decisions — to prototype and promote a product that solves a real problem in the UAE?
Success Criteria (Measurable)	The student has met the learning targets by: • Generating an AI visual prototype that clearly matches their hand-drawn design. • Refining the output through at least one further prompt and recording each iteration in the Iteration Log.
National Identity Domain	**Culture – Promotion of:** technology, innovation, artificial intelligence and ethical digital design that support the UAE's vision for a secure, innovative, knowledge-based economy. **Values –** responsible digital citizenship, critical thinking and future-ready skills.
