Week 9 : 26th Oct 2026 to 30th Oct 2026

Subject/الموضوع: MYP Biology **Unit Title/عنوان الوحدة:** Unit 6 – The Human Body (GRASPS: Heart Rate Investigation) **Grade/الصف:** 10

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formativeتكويني/ Summativeختامي / Differentiationالتمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Lesson 1: 1 الحصة **Collecting & Analysing Data** جمع البيانات وتحليلها	• I can collect, present and interpret heart-rate data to evaluate my hypothesis and method.	4.1 Provide alternatives for physical action and methods of response. 5.2 Use multiple tools for composition (spellcheckers, manipulatives, templates). 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools. **Formative:** Results table, recovery graph & CER checklist (Crit. C). **Differentiation:** Tiered graph & CER frames; SEN: digital graph template.	• Graph checklist + Criterion C rubric (Toddle) • Class heart-rate dataset (for students unable to exercise) • Excel / Google Sheets graphing guide
Lesson 2: 2 الحصة **Heart-Health Recommendations & Submission** توصيات صحة القلب وتسليم المهمة	• I can use my findings and reliable sources to evaluate cardiovascular health in the UAE and give evidence-based heart-health recommendations.	5.1 Provide multiple communication media (text, speech, visuals, models). 7.2 Make learning relevant, authentic, and connected to students' backgrounds. 9.3 Develop self-assessment and self-reflection with tools, charts, and feedback displays. **Formative:** Self- and peer-assessment with A–D rubrics. **Summative:** Heart Health Report – GRASPS (MYP A–D, 0–8). **Differentiation:** Tiered research organisers; SEN: curated sources, poster option.	• Heart Health Report template + A–D rubrics (Toddle) • who.int – Cardiovascular diseases • APA citation guide (Toddle)
Homework الواجبات	• Report Sections 3–4: data table, graph, interpretation & evaluation – Toddle. • Submit the final Heart Health Report on Toddle by the class deadline.	6.3 Facilitate organization with graphic organizers, prompts, and note-taking guides. 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools. 8.4 Provide mastery-oriented feedback that emphasizes growth and improvement.	• Toddle – GRASPS submission folder • MYP A–D rubrics (Toddle)
Teacher's notes/ Reminders ملاحظات المعلم والتذكير	• Week 9 completes the GRASPS task (Criteria C & D); the final report is submitted on Toddle. • Lesson 1 includes light exercise – comfortable shoes and a water bottle; students who cannot exercise use a class dataset.		

الأسبوع 9 Week 9

Technology Integration دمج التكنولوجيا	• Toddle: submission, rubrics, self- and peer-assessment. • Excel / Google Sheets: averages and recovery line graphs.
Cross-curricular links الروابط بين المواد الدراسية	• **Mathematics:** averages, plotting line graphs, describing trends. • **Physical Education:** recovery heart rate as a measure of fitness. • **English / Individuals & Societies:** report writing, citing sources (APA), public-health issues in the UAE.
External Assessment Integration دمج التقييمات الخارجية	• **MAP Growth Science:** data analysis and interpretation of graphs; evaluating evidence.
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	• **Thinking (critical):** interpret heart-rate data and physiological graphs. • **Research (information literacy):** evaluate and cite reliable sources. • **Self-management / Wellbeing:** organise the final report; reflect on personal heart-healthy habits.
Standards المعايير	• HS-LS1-3: Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis. • HS-ETS1-3: Evaluate a solution to a complex real-world problem based on prioritized criteria and trade-offs. • MYP Criterion C (i, ii, iii, iv) and Criterion D (i, ii, iii, iv).
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	• **Conceptual:** How do the body's organ systems interact to perform functions no single system could perform alone? • **Debatable:** Should everyone have equal access to heart-health screening and care, regardless of ability to pay?
Success Criteria معايير النجاح **(Measurable)**	The student has met the learning targets by: لقد حقق الطالب/الطالبة أهداف التعلم من خلال: **Lesson 1 – Collecting & Analysing Data** • **MUST:** I can record resting, post-exercise and recovery pulse in a correctly labelled results table (bpm) and plot a recovery line graph. • **SHOULD:** I can calculate averages from repeat trials, describe the trend using scientific reasoning (feedback / homeostasis), and state whether my hypothesis was supported. • **COULD:** I can evaluate the validity of my method by identifying two or more limitations (e.g., pulse-counting error, unequal effort) and propose specific improvements. **Lesson 2 – Heart-Health Recommendations & Submission** • **MUST:** I can give two evidence-based heart-health recommendations linked to my data and list my sources in a reference list. • **SHOULD:** I can explain how lifestyle factors (physical activity, diet, smoking) affect cardiovascular disease in the UAE, using correct scientific language and in-text citations. • **COULD:** I can discuss and evaluate the social, economic and ethical implications of prevention and equal access to heart-health screening, and submit a report that meets all A–D criteria.
National Identity Domain مجالات الربط بالهوية الوطنية	Volunteering التطوع Respect الاحترام Heritage التراث المجال Area: Citizenship – Volunteering | Values – Respect | Culture – Heritage التطبيق Implementation: **Volunteering:** sharing heart-health advice with the school community. **Respect:** respecting peers' physical limits and recording data honestly. **Heritage:** traditional Emirati active lifestyle and diet vs modern habits and heart health.
