Week 9: 26th – 30th October 2026

Subject: Integrated Math I **Unit Title: Unit 1: Foundations of algebraic relationships** **Grade: 9**

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1 and 2: Functions	I can understand, represent, and analyze functions using equations, tables, graphs, and real-world situations.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Visual learning links:** **Lesson 1 and 2: Functions** **Lesson 3: Linearity and continuity of graphs**
Lesson 3: Linearity and continuity of graphs	I can identify and analyze linear and continuous graphs by examining their features, patterns, and relationships between variables.		
Lesson 4: Formative 4 Functions and Relations	I can identify and represent functions and relations using tables, graphs, mappings, and equations, and determine whether a relation is a function.		
Teacher's notes/ Reminders	- Make use of the notebook provided. - Resources used in class will be in the team's channel. - Extra practice sheets can be found on the teams shared folder. **Mc Graw hill: Can be accessed on Toddle:**		

Week 8

Technology Integration **دمج التكنولوجيا**	MAGMA Mc graw hill Teams Class Textbook/workbook.
Cross-curricular links **لروابط بين المواد الدراسية**	• Science: Writing and evaluating formulas (physics, chemistry); • Economics: Cost modelling, budget allocation, currency conversion • Geography/Social Studies: UAE urban development, sustainability, resource management
External Assessment Integration **دمج التقييمات الخارجية**	MAP – Common core 6+

Wellbeing/ ATL Skills ة النفسية / أساليب التعلم	Thinking skills: Critical thinking: evaluating models; Transfer: applying algebraic reasoning to new contexts Structured debates on expression form; model critique (Slide 9); debatable inquiry questions Communication skills: Writing to explain mathematical reasoning; presenting to an audience Two-column equation solving; written explanations on slides; 4–6-minute pitch Self-management skills: Organization: managing a multi-part project; Time management: meeting pitch deadlines Project journal; work periods with structured milestones; checklist in task document
Standards المعايير	F.IF.1, F.IF.2 F.IF.5, A.REI.10
Inquiry/ TOK Question البحث والاستقصاء أسئلة	How can you solve an equation with the variable on each side?
Success Criteria (Measurable) معايير النجاح	**Lesson 1 and 2:** Students must: Determine whether a relationship represents a function. Students should: Use function notation, such as f(x), to evaluate functions. Students could: Model a real-world situation using a function and justify whether the model is appropriate. **Lesson 3:** Students must: Recognize continuous and discontinuous graphs. Students should: Explain the difference between continuous and discontinuous graphs. Students could: Analyze real-world situations to determine whether a relationship is linear and continuous. **Lesson 4:**

	Students must: Represent relations using tables, graphs, mappings, and ordered pairs Students should: Distinguish between functions and non-functions using different representations. Students could: Justify whether a relation is a function using mathematical evidence
National Identity Domain **مجالات الربط بالهوية الوطنية**	Volunteering التطوع Respect الاحترام History التاريخ
	التطبيقImplementation: National Identity Link - Students explore the four UAE sector choices (Tourism, Renewable Energy, Transport, Housing) through a brief gallery of real UAE projects
