Week 11: November 9-November 13, 2026

الأسبوع #: من - إلى

Subject/الموضوع: Science **Unit Title عنوان الوحدة:** Grasp Task **Grade الصف: 6**

Lessons الحصص	Learning targets أهداف التعلم	Assessment tools and strategies التقييم Formative تكويني/ Summative ختامي / Differentiation التمايز	Resources and links for Parents و المصادر الروابط المخصصة لأولياء الأمور
Lesson 1 Building our Scientific Knowledge Portfolio	I can explain how cells are organized into tissues, organs, and organ systems, and how body systems work together to maintain life.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 2.5 Use multiple media to illustrate concepts (diagrams, videos, models). 6.4 Support progress monitoring with rubrics, checklists, and visual progress tools.	Inspire Science Unit 1 Workbook (provided by school) and kept in classroom until the end of the unit. Inspire Science Digital Access (not yet available) Teams Class Materials W5 Folder
Lesson 2 Investigating the Effect of Exercise on Heart Rate	I can plan and conduct a scientific investigation to determine how physical activity affects heart rate.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 3.1 Activate prior knowledge using organizers, links, and pre-teaching. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	PPT Presentations, Reading Essentials and Notebook
Lesson 3 Processing Data and Creating a Body Systems Model	I can organize and interpret scientific data and develop a model explaining how body systems respond to exercise.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Lesson 4 Healthy Living Recommendations and Final Portfolio Submission	I can use scientific evidence to recommend healthy lifestyle practices and communicate how body systems support health and wellbeing.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty. 3.1 Activate prior knowledge using organizers, links, and pre-teaching.	PPT Presentations, Reading Essentials and Notebook
Homework الواجبات	Review lesson notes		

Teacher's notes/ Reminders **ملاحظات المعلم والتذكير**	Please encourage your child to review and practice Science regularly each week using the resources available in their class **Microsoft Teams - class material folder which is organized by week**. The presentations, readings, videos, practice activities, etc. posted in Teams are the primary learning materials and should be used throughout the unit to support understanding and achievement. Science study guides will provide **basic *assessment information, topics, and expectations***; however, they are intended as a guide only and will **not contain detailed study materials,** these are found in the class teams. **Effective preparation for graded formatives and summatives requires students to actively engage with the learning materials provided in their class teams.** Thank you for partnering with us to support your child's learning and success.

Week # الأسبوع#

Technology Integration دمج التكنولوجيا	Inspire Science Digital Interactives, PPT
Cross-curricular links الروابط بين المواد الدراسية	**ELA** – Scientific vocabulary and evidence-based explanations using models and observations.
External Assessment Integration دمج التقييمات الخارجية	MAP
Wellbeing/ ATL Skills الصحة النفسية/ أساليب التعلم	**Thinking – Critical Thinking:** Analyse and organize scientific information to explain how cells are the basic units of life, using evidence and scientific reasoning to develop the GRASP Task display board, PowerPoint presentation, and model. **Research – Information Literacy:** Gather, evaluate, and present relevant scientific information, diagrams, and evidence about cells to develop accurate explanations and communicate scientific concepts effectively through the GRASP Task display board, PowerPoint presentation, and model.
Standards المعايير	**NGSS MS-LS1-1**: Conduct an investigation to provide evidence that living things are made of cells, either one cell or many different numbers and types of cells. **NGSS MS-LS1-2:** Develop and use a model to describe the function of a cell as a whole and how its parts contribute to its function.
Inquiry/ TOK Question البحث والاستقصاء أسئلة TOK	How can we use scientific evidence and models to explain that all living things are made of cells?
Success Criteria معايير النجاح **(Measurable)**	**Lesson 1:** **Must – DOK 1:** I can identify cell structures and describe their functions. **Should – DOK 2:** I can explain how cells, tissues, organs, and organ systems are organized. **Could – DOK 3:** I can explain how the circulatory and respiratory systems work together to support life. **Lesson 2:** **Must – DOK 1:** I can identify the research question and make a prediction. **Should – DOK 2:** I can identify variables and describe the steps of a fair investigation. **Could – DOK 3:** I can conduct a controlled investigation and collect reliable heart rate measurements.

	Lesson 3: **Must – DOK 1:** I can organize heart rate measurements into a table and graph. **Should – DOK 2:** I can describe changes in heart rate using evidence from my investigation. **Could – DOK 3:** I can develop a labeled scientific model explaining how the circulatory and respiratory systems interact during exercise. **Lesson 4:** **Must – DOK 1:** I can identify healthy habits that support the circulatory and respiratory systems. **Should – DOK 2:** I can explain how physical activity supports health using scientific knowledge. **Could – DOK 3:** I can justify healthy lifestyle recommendations using evidence from my investigation and communicate my findings clearly.
National Identity Domain **مجالات الربط بالهوية الوطنية**	Belonging الإنتماء Global Understanding التفاهم العالمي Heritage التراث
	المجال Area: Students recognize the importance of maintaining a healthy lifestyle, understanding the human body, and appreciating scientific knowledge that supports community health and wellbeing in the UAE.
	Implementation: **National Identity (Citizenship – Informed Decision-Making):** Students will apply their understanding of cell theory by researching, organizing, and presenting scientific information through a display board, PowerPoint presentation, and model demonstrating that all living things are made of cells.
