Week 11: 9th – 13th November 2026

Subject: Mathematics (Course 1) **Unit Title: Unit 2: Ratio Rates and percentages** **Grade: 6**

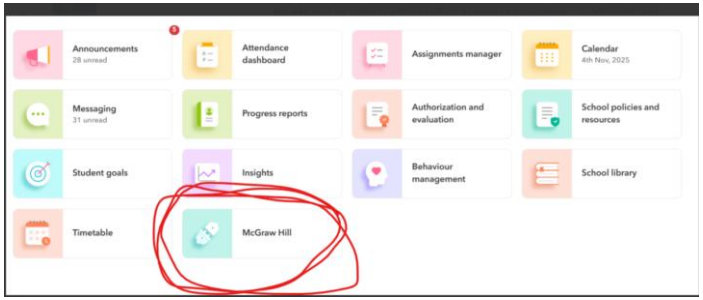

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1: Find and compare percentages	I can calculate a given percent of a number using different strategies, such as converting the percent to a decimal or fraction and multiplying.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Visual learning links:** **Lesson 1:** Find and compare percentages **Lesson 2 and 3:** Determine the whole given the part and percent
Lesson 2 and 3: Determine the whole given the part and percent	I can determine the whole amount when I am given a part and a percent by using proportional reasoning, equivalent fractions, or equations.		
Lesson 4: MAGMA Skill test	I can demonstrate my mathematical knowledge and understanding by independently completing a MAGMA skills test, applying appropriate strategies, showing my working, and interpreting my answers accurately.		
Teacher's notes/ Reminders	- Make use of MAGMA – as this gives students extra practice. - Teaching and learning resources will be uploaded on teams in the shared files folder. Extra notes/practice will be provided in this folder. - **Please check all grades in toddle. Please see if the Unit 1 GRASP has been submitted on toddle.** - **Please check all grades on toddle and see if you have any missing grades – follow up with your teacher.** - **Please note that there is homework after each lesson – Whitin the PowerPoint on the last slide students are requested to complete ALL tasks.**		

-

Mc Graw hill: Can be accessed on Toddle:

MAGMA login: Students should know their Microsoft username and password (download the application to sign in with your QR code). Please go to your teacher for assistance.
Please make use of MAGMA for extra practice.

Technology Integration دمج التكنولوجيا	MAGMA Teams Class notebook/workbook.
Cross-curricular links لروابط بين المواد الدراسية	Science: Speed, density, and other rates; unit conversions in experiments Economics/Business: Discounts, profit, tax, and financial literacy Geography: Scale maps and population density Food Technology: Recipe scaling and proportions
External Assessment Integration دمج التقييمات الخارجية	MAP – Common core 6+

Wellbeing/ ATL Skills ة النفسية/ أساليب التعلم	Thinking Skills (Transfer & Application): Applying ratio reasoning to real-life situations (finance, measurement, scaling) Communication Skills: Representing relationships using multiple forms (tables, graphs, diagrams, equations) Research Skills: Interpreting real-world data involving rates (e.g., speed, price comparisons) Self-Management Skills: Selecting appropriate strategies (tables, diagrams, unit rates) to solve problems Social Skills: Discussing and justifying proportional reasoning with peers
Standards المعايير	6.RP.A.1 – Understand and use ratio language to describe relationships between quantities 6.RP.A.2 – Understand and interpret unit rates in real-world contexts 6.RP.A.3 – Use ratio and rate reasoning to solve real-world and mathematical problems 6.RP.A.3a – Represent equivalent ratios using tables and graphs 6.RP.A.3b – Solve problems involving unit rates (e.g., price, speed) 6.RP.A.3c – Find and use percent of a quantity in problem solving 6.RP.A.3d – Use ratio reasoning to convert measurement units
Inquiry/ TOK Question البحث والاستقصاء أسئلة	What is a fraction and why are they important?
Success Criteria (Measurable) معايير النجاح	**Lesson 1:** Students must: Convert a percent into a decimal or fraction. Students should: Use equivalent fractions to find a percent of a number. Students could: Solve word problems involving an unknown whole or percentage. **Lesson 2 and 3:** Students must: Calculate the whole when given the part and percent. Students should: Explain why the method works and check the reasonableness of the answer. Students could: Compare different methods and justify the most efficient strategy. **Lesson 4 MAGMA skill test:** Students must: Appropriate mathematical operations and methods. Students should: Use mathematical vocabulary, symbols, and notation correctly. Students could: Apply my mathematical knowledge to unfamiliar problems.
National Identity Domain	Volunteering التطوع Respect الاحترام History التاريخ

مجالات الربط بالهوية الوطنية	المجالArea: Economic Growth: Population Studies: Use measures of center to analyze demographic data, such as age distributions in different Emirates. Health and Wellness: Use dot plots and histograms to represent health-related data, such as the prevalence of various sports and physical activities in the UAE.
	التطبيقImplementation: Social Studies: Develop statistical questions to investigate cultural practices and traditions in different regions of the UAE.
