Abu Dhabi City Campus Daily/Weekly Planner

Week 11: 9–13 November 2026

Subject: MYP Design | Unit Title: Designing Ethical AI Systems – Creating the Solution (Criterion C) | Grade: 7

Lessons	Learning targets	Assessment tools and strategies Formative / Differentiation	Resources and links for Parents
Lesson 1: Planning the AI Prototype / Simulation: Design Stages	I can construct a logical plan, in clear design stages, for building my AI prototype or simulation.	Ongoing check (C.i): planning check and questioning (unweighted). **Support:** part-filled plan template and stage cards. **Challenge:** identify a risk to the plan and a back-up step.	Toddle: lesson slides and the Week 11 build-plan worksheet. **Parents:** Ask your child to explain the stages of their plan and how long each will take.
Lesson 2: Building the AI Prototype / Simulation (Part 1)	I can follow my plan to build the first stages of my AI prototype or simulation, using technical skills carefully.	**FORMATIVE 1 of 2 (C.i–ii):** Prototype Build Check – feedback only. **Support:** step-by-step build guide and test table. **Challenge:** explain one change made while building, and why.	Google Teachable Machine: teachablemachine.withgoogle.com; Canva or Scratch; Criterion C rubric. **Parents:** Ask your child to show their AI prototype and how they tested it.
Homework	Complete the build plan and upload screenshots of the first build stages to Toddle.	Self-check the plan and build evidence against the success criteria.	Show the first stages of the prototype to a family member.
Teacher's notes / Reminders	Bring a charged iPad/laptop and your chosen Criterion B design (Week 10). Train the AI only with objects, drawings or your own voice – never photos or voices of other students. This build continues in Week 12 (Formative 2 of 2).		

Week 11

Technology Integration	Google Teachable Machine to train and test an image or sound model; Canva, Google Slides or Scratch for rule-based simulations; screenshots of build stages uploaded to Toddle.
Cross-curricular links	Mathematics: time estimates and accuracy as percentages. Science: fair testing and recording results. Visual Arts: layout and labels. Computer Science: input, process and output.
External Assessment Integration	Not applicable to these lessons. Formative 1 of 2 covers Criterion C i–ii.
Wellbeing / ATL Skills	ATL: self-management (planning time), critical thinking (testing) and communication. Wellbeing: safe, respectful use of data and protecting privacy.
Standards	CS.MS.1.2; CS.MS.5.3 MYP Design Criterion C: i. Construct a logical plan with time and resources; ii. Demonstrate technical skills when making the solution.
Inquiry / TOK Question	How can I design and build an AI system that is accurate, fair and safe for the students in my school?
GRASPS Task	**Goal:** build an ethical AI prototype for a school problem. **Role:** AI designer. **Audience:** classmates and teachers. **Situation:** the school only uses safe, fair AI. **Product:** AI prototype/simulation. **Standards:** Criterion C.
Success Criteria (Measurable)	**Lesson 1** **MUST:** Plan the design stages needed to build my AI prototype or simulation. **SHOULD:** Give each stage a realistic time, resources and a test point. **COULD:** Identify a risk to the plan and a back-up step. **Lesson 2** **MUST:** Build the first stages of my prototype by following my plan. **SHOULD:** Test the prototype with new inputs and record at least 5 results. **COULD:** Explain a change I made while building, and why.
National Identity Domain	Connect AI innovation to the UAE National Strategy for Artificial Intelligence 2031 and a secure, knowledge-based economy. Demonstrate fairness, privacy and responsible digital citizenship.
