Week 11: 9th – 13th November 2026

Subject: Mathematics (Course 2) | Unit Title: Percentages and Proportional Reasoning | Grade: 7

Lessons	Learning targets	Assessment tools and strategies Formative/ Summative/ Summative Differentiation	Resources and links for Parents
Lesson 1: Solve Percent Change Problems (4-3)	I can calculate and explain percent increase or percent decrease by finding the amount of change, dividing by the original value, and multiplying by 100.	2.1 Clarify vocabulary and symbols using visuals, connections, and supports. 8.2 Vary challenge level with differentiated tools, resources, and difficulty.	**Visual learning links:** **Lesson 1:** Solve Percent Change Problems **Lesson 2:** Solve Markup and Markdown Problems **Lesson 3:** Solve Simple Interest Problems
Lesson 2: Solve Markup and Markdown Problems (4-4)	I can calculate markup, markdown, selling price, and discount using percentages and proportional reasoning.		
Lesson 3: Solve Simple Interest Problems (4-5)	I can use I = Prt to calculate simple interest and the total amount for a given principal, rate, and time.		
Lesson 4: Formative Assessment	I can independently apply percent change, markup and markdown, and simple interest strategies, show my working, and use feedback to improve.		
Teacher's notes / Reminders	**Homework:** Complete **Student Book** pages 175, 181, 189, 195 and 201 by **Friday, 13 November 2026** **GRASPS Task:** Start working on your GRASPS task with your teacher during the lesson and complete it at home. Follow all the instructions and use the resources provided by your teacher to help you complete the task successfully and on time. **Daily Magma Practice:** Remember to practice **Magma Math daily** to strengthen the new skills you are learning in class and improve any previously taught skills you have not yet mastered. **Magma Login Reminder:** Sign in using your **school Microsoft Teams email and password**. Make sure to click the **Microsoft icon at the top of the login page** to access your account.		

Technology Integration دمج التكنولوجيا	Microsoft Teams; McGraw Hill Reveal Math Course 2 digital and print resources; digital mathematics practice; class notebook/workbook.

Cross-curricular links لروابط بين المواد الدراسية	Business and Economics: Retail pricing, discounts, markups, and interest. Financial Literacy: Saving, borrowing, and responsible spending. Social Studies: Interpreting changes in UAE prices and economic data.
External Assessment Integration دمج التقييمات الخارجية	MAP-aligned proportional reasoning and multi-step mathematical problem-solving practice.
Wellbeing/ ATL Skills ة النفسية/ أساليب التعلم	Thinking Skills: Select and apply percent models in authentic situations. Communication Skills: Explain calculations using precise mathematical vocabulary. Self-Management Skills: Check calculations, reflect on feedback, and correct errors. Social Skills: Compare strategies and justify solutions respectfully.
Standards المعايير	7.RP.A.3 – Use proportional relationships to solve multi-step ratio and percent problems, including percent increase/decrease, markups, markdowns, and simple interest. 7.EE.B.3 – Solve multi-step real-life mathematical problems with positive and negative rational numbers; assess the reasonableness of answers.
Inquiry/ TOK Question البحث والاستقصاء أسئلة	How do percentages help us make informed decisions about shopping, saving, and borrowing?
Success Criteria (Measurable) معايير النجاح	**Lesson 1:** Must: Identify the original and new values and calculate the amount of change. Should: Calculate percent increase or decrease and label it correctly. Could: Solve and justify multi-step real-life percent-change problems. **Lesson 2:** Must: Identify the original price and the markup or markdown rate. Should: Calculate the price change and final selling price. Could: Compare multiple discounts or successive price changes and explain the best deal. **Lesson 3:** Must: Identify principal, annual interest rate, and time; convert the rate to a decimal. Should: Use I = Prt accurately and calculate the total amount. Could: Solve for a missing variable and compare savings or borrowing situations. **Lesson 4:** Must: Complete core questions on the three skills and show calculations. Should: Explain methods and correct errors using feedback. Could: Apply the skills to unfamiliar multi-step real-life problems.
National Identity Domain مجالات الربط بالهوية الوطنية	Volunteering التطوع Respect الاحترام History التاريخ Area: Economic Growth and Financial Literacy. Explore percentage changes in UAE retail prices and compare savings scenarios. Implementation: Analyze UAE shopping promotions and simple-interest savings examples, explaining financially responsible choices.
