Abu Dhabi City Campus Daily/Weekly Planner

Week 11: 9–13 November 2026

Subject: MYP Design | Unit Title: AI-Assisted Product Prototyping & Campaign Design – Creating the Solution (Criterion C) | Grade: 8

Lessons	Learning targets	Assessment tools and strategies Formative / Differentiation	Resources and links for Parents
Lesson 1: Planning the Prototype & Campaign Build: Stages, Time & AI Tool Use	I can construct a logical plan for building my hand-drawn prototype, AI visual prototype and advertisement campaign, managing my time effectively.	**Ongoing formative evidence (C.i):** teacher observation, questioning and planning check (unweighted). **Support:** planning template with sentence starters. **Challenge:** identify a risk to the plan and a contingency.	Toddle: lesson slides and project planning template. **Parents:** Ask your child to show their plan and how long each stage will take.
Lesson 2: Creating the Hand-Drawn Conceptual Prototype (Original Design)	I can create an original, hand-drawn conceptual prototype of my product, demonstrating my own design decisions.	**FORMATIVE 1 of 2 (Criterion C i–ii):** Hand-Drawn Conceptual Prototype – teacher feedback (unweighted; feeds into the final Prototype & Campaign summative). **Support:** labelled example sketch. **Challenge:** explain a design decision made during the drawing process.	Toddle: Formative 1 task sheet and Criterion C rubric. **Parents:** Ask your child to talk you through the features of their drawing.
Homework	Complete the project plan and finish labelling the hand-drawn prototype.	Self-check the plan and sketch against the success criteria.	Check the sketch is ready to bring to school for Week 12.
Teacher's notes / Reminders	Lesson 2 is Formative 1 of 2 – bring a pencil, eraser, ruler and coloured pencils. The hand-drawn prototype is the starting point for the AI visual in Week 12, so it must be the student's own original work.		

Week 11

Technology Integration	Digital planning template (timeline / Gantt chart) on Toddle; introduction to the AI tools and the rules for using them responsibly.
Cross-curricular links	Business: planning and promoting a product. ICT: choosing AI tools for the build. Art & Design: sketching and labelling the hand-drawn prototype.
External Assessment Integration	Not applicable to these lessons. Formative 1 of 2 covers Criterion C i–ii.
Wellbeing / ATL Skills	ATL: self-management (planning time) and creative thinking (original ideas). Wellbeing: a realistic plan reduces project stress.
Standards	Lesson 1: MYP Criterion C (i); CS.AP.1; CS.CS.1 Lesson 2: MYP Criterion C (i–ii); CS.AP.1 MYP Design Criterion C: i. Construct a logical plan with time and resources; ii. Demonstrate technical skills when making the solution.
Inquiry / TOK Question	How can I use AI as a tool — while keeping creative control of my design decisions — to prototype and promote a product that solves a real problem in the UAE?
GRASPS Task	**Goal:** prototype and promote a product that solves a UAE problem. **Role:** product designer. **Audience:** classmates and teachers. **Situation:** UAE Future Innovation Showcase. **Product:** sketch, AI visual and ad campaign. **Standards:** Criterion C.
Success Criteria (Measurable)	**Lesson 1** **MUST:** List the stages needed to build the prototype and campaign. **SHOULD:** Allocate realistic time to each stage. **COULD:** Identify a risk to the plan and a contingency. **Lesson 2** **MUST:** Produce a hand-drawn prototype of my product. **SHOULD:** Label key features and how they meet a specification. **COULD:** Explain a design decision made during the drawing process.
National Identity Domain	Technology, innovation, artificial intelligence and ethical digital design support the UAE's vision for a secure, innovative, knowledge-based economy; responsible digital citizenship, critical thinking and future-ready skills.
